**PRICE:** Body only, \$1,450; with 75mm 1/3.5 lens (as shown), \$2,570.

Medium-format rangefinder cameras with interchangeable lenses have never been commonplace, nor have they been inexpensive. Fortunately, there is one superb example—the Mamiya 6—that also happens to be one of the nicest 2 1/4 x 2 1/4 field cameras in current production. It's got an excellent range/viewfinder, a light, compact body that's very comfortable to hold, a clever and competent auto- and manual-exposure system, and nicely placed controls. Although the 6's present optical array is limited to three Mamiya lenses—a 75mm 1/3.5 normal, 50mm 1/4 wide-angle, and 150mm 1/4.5 tele—all are useful focal lengths, and our field tests indicate that they're of very good quality.

Bring your eye up to the eyepiece at the upper left-hand corner of the body and what you see is strongly reminiscent of the view through an M-series Leica—a bright, distortion-free image, an extremely bright central rangefinder patch with good separation between the superimposed images, and superbly delineated framelines corresponding to the field of view of each mounted lens. The square framelines move vertically and laterally as you focus to compensate for parallax over the entire focusing range, and they're auto-indexing—as you mount a lens, only the correct framelines for that focal length appear.

Behind the central frosted window in the range/viewfinder module is the heart of the Mamiya 6's exposure system, a silicon photodiode with a claimed measuring range of EV 3.5-18 at ISO 100. Although this location does not provide through-lens metering (its readings are heavily center-weighted with the 50mm lens, normally centerweighted with the 75mm, and full-area averaging with the 150mm), it is coupled to the aperture and shutter-speed con-

trols, giving you the choice of manual match-dial or aperture-priority autoexposure (AE).

The large, knurled 4-to-1/500-sec-plus-B shutter dial atop the body controls an electromagnetically timed  $\pm 00$  leaf shutter in each lens, has separate settings for AE and AE lock, and incorporates an ISO 25-1600 film-speed scale. Camera-selected and/or user-selected shutter speeds are read out along the extreme left-hand edge of the finder, well beyond the field framelines, by means of LED-transilluminated numbers. In AE mode you see only the camera-selected shutter speed for the aperture you've set; in manual-metering mode, you turn the aperture ring or shutter-speed dial until the flashing and steadily lit digits coincide to obtain the correct metered exposure.

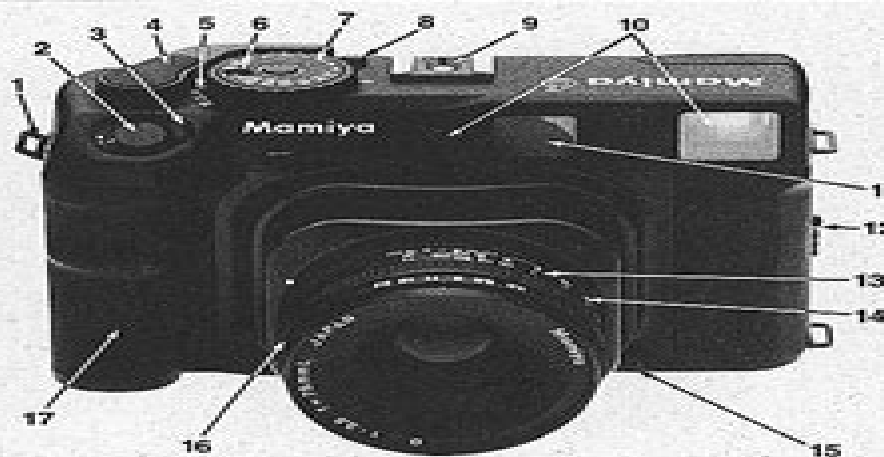

While the exposure system is commendably accurate, it is nearly impossible to see any of these numbers while looking straight through the finder; a separate sideward glance is required, especially if you wear glasses. However, the finder readouts have been somewhat improved over those of early production models. They remain visible even when shooting against the light in most cases, and are easy to see under dim indoor lighting conditions as well.

Since the Mamiya 6 is a leaf-shutter camera without an SLR mirror to shield the film from light when you change lenses, some sort of darkslide is needed. Mamiya solved this problem ingeniously by building a fabric darkslide and a system of fail-safe interlocks into the body.

The 6's collapsible front is

equally ingenious. Hold in a small button below the left of the lens and you can pull the lens forward about 1 1/4 inches on a sliding, interlocking metal body section until it clicks into shooting position. Although this squarish, round-cornered lens surround nests very smoothly and precisely into the body, there's a conventional bellows inside for light-tightness.

Who will buy this unconventional aristocrat of the medium-format set? Professionals who wish to have a light, quiet, smoothly operating field camera offering high performance along with a big image area, and discerning amateurs who can appreciate its singular virtues. Despite its princely price, the Mamiya 6 has proven to be very successful among camera connoisseurs of both types.
