Women & Guns ,2005 **Twenty Years of School-based Mass Shootings in the United States** Angelyn Spaulding Flowers,Cotina Lane Pixley,2020-10-05 Twenty Years of School based Mass Shootings in the United States Columbine to Santa Fe is an examination of twenty years of school based mass shootings from Columbine to Santa Fe exploring the larger environmental framework within which these incidents occurred Angelyn Spaulding Flowers and Cotina Lane Pixley use a mixed methods approach to examine a diverse set of factors identifying risk and protective factors along with specifically desired public policy responses by evaluating the convergence of variables from the range of school based mass shootings included in this study These variables include the type of weapon used the availability of that type of weapon perpetrator characteristics school characteristics as well as the geospatial and demographic characteristics of the school neighborhood These school based mass shooting incidents are explored at both the state and regional level and are further discussed in comparison to leisure time gun use homicide rates and suicide rates in the geographical area The overarching geospatial analytical framework for this research also includes an examination of the manner in which existing policy enactments such as state gun laws vary by geography Spaulding Flowers and Lane Pixley argue that the increased number of fatalities in

school based mass shooting is largely due to the increased lethality of the weapons and they propose alternative solutions. Scholars of criminology, sociology, political science, and history will find this book particularly useful. Publications Stocked by the Marine Corps (indexed by Distribution), 2001. **Modern American Extremism and Domestic Terrorism** Barry J. Balleck, 2018-06-01. Highlighting a breadth of American individuals and groups that engaged in extremist behavior across history, this book provides a succinct, concise overview of extremist behavior in the past and examines today's increasingly common incidences of hate and extremism. Since the election of Barack Obama in 2008, extremist and hate groups have seen a resurgence on the American political landscape. Members of these subgroups within the American population have become concerned that the America that they have always known is fading into oblivion with a majority of individuals in these groups holding fiercely anti-immigration views and adhering to the belief that the United States should not admit large numbers of any group that is not white, Christian, or predominantly European. Others believe that the principles and precepts of the U.S. Constitution have gone by the wayside and that drastic measures are required to protect the underlying tenets that were the essential elements of the Constitution and many of their nation's founding principles. How did these individuals come to feel this way? Is it possible to bring these impassioned extremists back into the fold, and if so, how? This book provides comprehensive, illuminating, and sometimes disturbing insights into the individuals, groups, and events that have illustrated extremist behavior in post-World War II America. Ranging from the anti-communist rhetoric and activities of the John Birch Society to the radical socialist ideals of the Black Panthers to the goals of a pure America articulated by white nationalists, this book documents the various extremist elements that shaped the second half of the 20th century as well as the first two decades of the 21st century. Readers will grasp how events in the histories of individuals and groups as well as perceived injustices have led to the incidences of hate and extremism in American society. The encyclopedic entries of the book are specifically written to be accessible to readers without specific knowledge of extremism, political science, or sociology. Guns, Drugs, and Violence United States. Congress. House. Committee on Foreign Affairs. Subcommittee on the Western Hemisphere, 2009. *Force-On-Force Police Training Using Airsoft* Luis E. Martinez, Luis E. Martinez Med, 2008-06. Airsoft technology fills the gap between static square range based training and the reality of a dynamic armed confrontation. This book introduces police trainers to the how-to of using these weapons, the various types available, technical data, and offers sound advice on the safety aspects of reality-based training. Cover. **The Lives of Guns** Jonathan Obert, Andrew Poe, Austin Sarat, 2018-09-03. Guns have never been as prevalent in American culture as they are at this moment. Most contemporary conversations on guns either highlight the gun as just a tool used in mass killings or a right to be fiercely defended. Eventually, whatever progress these debates foster in the public conversation tends to halt altogether once the old cliché "guns don't kill people, people kill people" is trotted out. These gun control and gun violence discussions take the gun as a passive object, ignoring the changing effects and the very agency that guns may deploy as politicized objects. What happens if we reset the

conversation and admit that guns and not the people behind them kill people The Lives of Guns offers a new and compelling way of thinking about the role of the gun in our social and political lives In gathering ideas from law science studies sociology and politics each chapter turns the stale standard gun conversations around by investigating the gun as an object with agency In approaching guns from a technological perspective down to the very science of how they are created and how they fire The Lives of Guns takes up a number of questions such as How does the presence of these objects shape civic ideology What does it mean to develop and care for gun and gun accessories technology What do guns mean to those who build them versus those who fight for and against them What could happen when drone technology meets gun technology In bringing together fresh perspectives from leading lawyers political scientists and historians The Lives of Guns promises to move the gun debate forward by opening up new ways of thinking about these issues and broadening the scope of these perennial debates
