

Memco Panachrome

2D/3D 43mm Profile

Installation Guide

Ref No. CS40-250GB version 1

1. Detector Installation

The Panachrome 43mm 3D/2D detectors can be fitted to centre-opening or side-opening doors. For the visual indications to be effective, the system should only be installed in dynamic mode, with at least one of the detectors fixed to a moving door. TX detector must be fitted to left side of lift when viewed from landing.

Installation Notes – 2D/3D

1. The landing doors must not lead the car doors by more than the suggested permissible amount as shown in Fig 1.
2. Screw the earth ring tag to the lift door using a No.8 screw and a shakeproof washer.
3. The earth must be fitted to ensure the unit is properly grounded.
4. Check also that the door itself is grounded to the lift.
5. Use a P-clip either side of the pluggable connectors, to reduce the risk of plug and socket separating.
6. Do not shorten Memco cables by cutting them.
7. Detectors should be aligned as closely as possible for reliable operation.

Installation Notes – 3D

1. When installing a Panachrome 3D system, the following precautions must be observed for trouble-free operation.
2. Always mount the detectors as close to the door edge as possible.
3. Sight-Guards cannot be used with Panachrome 3D detectors.
4. For opening exceeding 1000mm, it is recommended that 'As Doors Close' mode is used.
5. The detectors must be set no more than 10mm apart when the doors are fully closed. The detectors must be aligned to within +-5mm of the detector centreline.
6. 3D Switch Settings are detailed on the inside of the Main Controller CS40-000.

2. To Remove Panachrome from Fixing L-Bracket

This is done by leveraging the main detector from the bracket attachment
