The master clutch assembly is composed of two dry, single-plate clutches, one for the tractor transmission drive and the other for the power-take-off drive.

The unit is controlled by one single pedal which, during the first part of its travel, disengages the main clutch (transmission) and in the following one, the power-take-off, but only when this attachment is directly driven by the engine (independent power-take-off).

The three diagrams of Fig. 82 illustrate, respectively:

a) the clutch engaged; b) the main clutch disengaged; c) clutch completely disengaged.
