more about working with your house's location and situation than relying on intrusive technology and hi tech materials. With the soaring energy bills and the climate crisis it is now more important than ever to invest in a home that is considerate of keeping heat in. In this handbook architect Christopher Day draws on his extensive experience to explain the key principles of eco home design using common sense methods. Packed full of practical information it includes several case studies of eco homes reviewing with hindsight what worked well and what could have been better. There is also guidance on how to generate energy upgrading old buildings and site planning. With beautifully hand drawn illustrations Christopher explores how to use local topography combined with landscaping to improve your home's microclimate and keep your house dry and warm in the winter and cool in the summer. There are also handy tips on how to minimise hidden environmental impacts and ideas on ways to make your home a safe and healthy place both emotionally and physically. The Eco Home Design Guide is essential for anyone who wants to create an attractive environmentally friendly home that is in harmony with its location.
