

how to raise CHICKENS

For your next pet... try some of those feathered farm animals.

By Alexander Helbach
VICO 311

The chicken is the most common domestic animal in the world. Recent information has led scientists to believe that the domestication of the chicken began in Vietnam over 10,000 years ago. So, why raise chickens? They are low maintenance and the rewards are numerous, from the satisfaction of raising your own

food to the pride in seeing new chicks being born. As a food source their eggs are a wholesome source of protein. You can also be known as the person who raises their own chickens in the neighborhood.

To start off you might want to purchase hens that are a year old. Year old hens can be purchased from a local farm. The more mature hens will mean you can start producing eggs sooner than raising chicks from birth. The hens will lay an egg every two to three days. On average you would need 18 hens to get a dozen eggs a day.

Species: *G. gallus* Top Speed: 9 mph Heartbeat: 197 times per minute Alukterophobia: fear of chickens

The Chicken Coop

An indoor pen with the dimensions of twelve feet by eight feet will fit a dozen birds comfortably. The pen will need an area where the hens can sleep and lay their eggs. If the hens were not confined at night they would lay their eggs outside and it would be impossible to find them.

The birds also need an outside area about twice the size of the indoor pen. They will use this area to scratch around and eat. Chickens can fly so the outside he should have walls or a roof to keep the chickens escaping.

Fill the bottom of your outdoor coop with a mixture of cracked corn and wheat also known as scratch. The chickens will peck around at this during the day.

Predators

Raccoons are the most common predators of chickens. They will attack at night and they usually kill more than one. Other possible predators include dogs. A covered pen will protect them and give the birds shelter from the weather.

Collecting

The eggs can be collected daily when the hens are out of the pen. They are very protective of their eggs and will not appreciate you taking the eggs from under them.

Rooster or no Rooster?

A rooster is not necessary to get eggs. The hens will lay eggs with or without a rooster around. The only difference is that without a rooster the eggs will not be fertile.

On the big scale:

The top 5 states in the US that produce eggs per thousand a year.

Which came first? The chicken or the egg

After the hen lays the egg it will start growing into a chick when it reaches a temperature of 86 degrees F. The shade of the egg depends on the hen. The color can range from bright white to a dark shade of brown.
