Ronald R. Sims, 2023-01-01 The rapidly transforming environment that we live in has made human resource development HRD all the more necessary for the success of today's organizations. HRD initiatives help their organizations by developing employees who assist their organizations in not only surviving but thriving in our increasingly global world. Today's best practice or benchmarked organizations and their HRD professionals continue to recognize the importance of employee learning, knowledge, skills, and motivation to organizational success. This recognition increasingly opens many doors as organizational leaders accept the fact that HRD initiatives can be used to ensure that organization members have what it takes to successfully meet the demands that confront them and their organizations. This book takes the position that HRD can demonstrate how their initiatives help to develop a superior workforce so that the organization and its individual employees can accomplish their strategic and operational goals in service to their clients or customers. This book is written with the belief that HRD professionals have many opportunities to learn, change, and find ways both in and outside of the workplace to contribute to the development of learning organizations as we move further into the 21st century. A major point of this book is that HRD will continue to become more and more important to organizational success when one considers the increased responsibilities HRD professionals have taken on during and post the COVID pandemic. The primary audience for this book is practicing HRM and HRD professionals and other organizational leaders. The book provides proven ideas important to demonstrating the value of HRD. From a practical viewpoint, it is based on actual experience, a strong research base, and accepted practices presented in an easy-to-read form. A second target audience is students of HRD and HRM who are preparing for careers in this important field. This book will help them develop a solid foundation to the study of HRD practices or initiatives that are key to HRD success regardless of the type of organization. A third target audience is managers or leaders at all levels of an organization who are expected to take on a number of HRD responsibilities, e.g., as trainers, coaches, mentors, change agents, and so on, while regularly partnering with HRD professionals. It offers these individuals a firsthand look at what they should expect of their HRD functions or areas and how they can effectively work with HRD professionals in their organizations to achieve the organizations' strategic goals by getting the most out of its human people.

Food Waste Reduction and Valorisation Piergiuseppe Morone, Franka Papendiek, Valentina Elena Tartiu, 2017-04-26 This book adds a new dimension to the sustainability assessment of food waste reduction and valorisation policy analysis. Featuring a transdisciplinary analysis by key experts in the field, it identifies the drivers of change in food waste reduction and valorisation technologies by looking, for example, at the regulatory framework and at policy actions undertaken by local and global actors. The book explores the development of regulations and policies for food waste prevention, management, and valorisation at a global as well as European Union level. It also discusses the notion of food waste in legal terms and investigates the effects of the lack of a standard universal definition of food waste on the efficient use of by-products, promising processes, and products for technological and commercial exploitation. Utilising mathematical mapping methods to

assess food consumption impacts and providing supply chain models that allow the testing of consumption scenarios the book goes on to discuss a series of emerging technologies tested at lab scale and or pilot scale and opportunities for the valorisation of food waste **Popular Electronics** ,1976 Advances in Neural Computation, Machine Learning, and Cognitive Research III Boris Kryzhanovsky,Witali Dunin-Barkowski,Vladimir Redko,Yury Tiumentsev,2019-09-03 This book describes new theories and applications of artificial neural networks with a special focus on answering questions in neuroscience biology and biophysics and cognitive research It covers a wide range of methods and technologies including deep neural networks large scale neural models brain computer interface signal processing methods as well as models of perception studies on emotion recognition self organization and many more The book includes both selected and invited papers presented at the XXI International Conference on Neuroinformatics held on October 7 11 2019 in Dolgoprudny a town in Moscow region Russia **Crisis and Emergency Management** Ali Farazmand,2014-03-25 More than 12 years have passed since the publication of the first edition of Crisis and Emergency Management During that time numerous disasters from 9 11 to massive earthquakes in Iran and China to the giant Asian Tsunami Hurricane Katrina and the Fukushima Tsunami and ensuing nuclear meltdown have changed the way we manage catastrophic events With contributions from leading experts this second edition features 40 new chapters that address recent worldwide crises and what we have learned from emergency responses to them See What s New in the Second Edition Up to date concepts theories and practices Analysis of recent disasters and their effect on emergency management Policy and managerial lessons Suggestions for capacity building in crisis and emergency management The book covers a wide range of international issues using critical empirical and quantitative analyses It discusses various approaches to topics such as resolving political tension and terrorism issues the potential use of biological weapons and the role of public relations in crisis The author offers insight into organizational and community resiliency development a surprise management theory in practice for upgrading the knowledge and skills in managing crises and governing emergencies and better and more effective organizational political social and managerial coordination in the processes He presents case studies that enhance and advance the future theory and practice of crisis and emergency management while at the same time providing practical advice that can be put to use immediately Managing crises and governing emergencies in such an age of challenges demands a different kind of knowledge skills and attitudes that were not available yesterday This book gives you valuable information with applications at the macro micro organizational and interorganizational levels preparing you for emergency management in an increasingly globalized and uncertain world *Additive Manufacturing Applications for Metals and Composites* Balasubramanian, K.R.,Senthilkumar, V.,2020-06-19 Additive manufacturing AM of metals and composites using laser energy direct energy deposition electron beam methods and wire arc melting have recently gained importance due to their advantages in fabricating the complex structure Today it has become possible to reliably manufacture dense parts with
