

# Identifying X-Rays

AP020190 Specialist Practitioner: X-Physiology (2019)  
Activity

## Reading material

### Radiography

Radiation, radiography is the administration and study of parts of the body using X-rays. This means X-ray radiography is an interdisciplinary or allied health science discipline. Radiography professionals are trained to use X-ray machines to produce images of the body's internal structures. They are also trained to use X-ray machines to produce images of the body's internal structures. They are also trained to use X-ray machines to produce images of the body's internal structures.

Radiography is a very important part of the health care system. It is used to diagnose and treat many different conditions. It is also used to monitor the progress of treatment. Radiography is a very important part of the health care system.

With a little effort, you can identify X-ray images. Although the body is composed of a lot of different tissues, there are a few that are very different. These are the bones. X-rays are able to pass through the body's soft tissues, but they are blocked by the bones. This is what makes X-rays so useful. X-rays are able to show the internal structure of the body, and they are able to show the progress of treatment.

Radiography is one of the most common diagnostic procedures used in the health care system. It is used to diagnose and treat many different conditions. It is also used to monitor the progress of treatment. Radiography is a very important part of the health care system.

- Radiography is used to diagnose and treat many different conditions.
- Radiography is used to monitor the progress of treatment.
- Radiography is a very important part of the health care system.
- Radiography is used to diagnose and treat many different conditions.
- Radiography is used to monitor the progress of treatment.
- Radiography is a very important part of the health care system.

### Identifying X-Rays: What is X-ray?

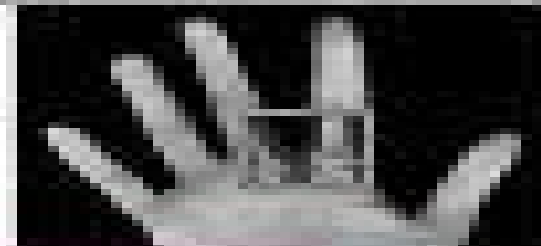

The structure of a part of the body is often identified by X-ray. This is done by using X-ray machines to produce images of the body's internal structures. They are also trained to use X-ray machines to produce images of the body's internal structures. They are also trained to use X-ray machines to produce images of the body's internal structures.

X-rays are a very important part of the health care system. They are used to diagnose and treat many different conditions. They are also used to monitor the progress of treatment. X-rays are a very important part of the health care system.
