LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your lizards?

My criteria were: size, color, and shape of the lizards.

Did your lizards grow different than I did?

Yes, because the lizards that I selected were different in size, color, and shape. I also noticed that some lizards were different in shape and color than others.

An adaptation is a structure or function that the organism has as a population because it increases the ability to survive and reproduce in a particular environment. Provide one example and an explanation of an adaptation of the lizard you chose.

The adaptation of the lizard I chose was its color. The lizard was green, which helped it blend in with the background and avoid predators.

Provide one evolutionary explanation for why diversifying for food would give a species that is a generalist (i.e., that grows) several benefits in a homogeneous

environment. The evolutionary explanation is that a generalist species can survive in a wide range of environments, which gives it a higher chance of survival and reproduction.
