**Posing and Solving Mathematical Problems** Patricio Felmer, Erkki Pehkonen, Jeremy Kilpatrick, 2016-04-29 This book collects recent research on posing and solving mathematical problems Rather than treating these two crucial aspects of school mathematics as separate areas of study the authors approach them as a unit where both areas are measured on equal grounds in relation to each other The contributors are from a vast variety of countries and with a wide range of experience it includes the work from many of the leading researchers in the area and an important number of young researchers The book is divided in three parts one directed to new research perspectives and the other two directed to teachers and students respectively

**Addition and Subtraction** Thomas P. Carpenter, James M. Moser, Thomas A. Romberg, 2020-08-15 A hallmark of much of the research on children's thinking in the 1970s had been the focus on explicit content domains Much of this research had been represented by an eclectic collection of studies sampled from a variety of disciplines and content areas However in the few years before this publication research in several content domains has begun to coalesce into a coherent body of knowledge Originally published in 1982 the chapters in this work represent one of the first attempts to bring together the perspectives of a variety of different researchers investigating a specific well defined content domain This book presents theoretical views and research findings of a group of international scholars who are investigating the early acquisition of addition and subtraction skills by young children Together the contributors bring a blend of psychology educational psychology and mathematics education to this topic Fields of interest such as information processing artificial intelligence early childhood and classroom teaching and learning are included in this blend
