Studyguide for Measuring Behaviour: An Introductory Guide by Martin, Paul, ISBN 9780521535632 Cram101 Textbook Reviews, 2015-09-17 Never HIGHLIGHT a Book Again Includes all testable terms concepts persons places and events Cram101 Just the FACTS101 studyguides gives all of the outlines highlights and quizzes for your textbook with optional online comprehensive practice tests Only Cram101 is Textbook Specific Accompanies 9780521535632 This item is printed on demand **Handbook of Ethological Methods** Philip N. Lehner, 1998-04-16 At first glance studying behavior is easy but as every budding ethologist quickly realises there are a host of complex practical methodological and analytical problems to solve before designing and conducting the study How do you choose which species or which behavior to study What equipment will you need to observe and record behavior successfully How do you record data in the dark in the wet or without missing part of the action How do you analyse and interpret the data to yield meaningful information This new

expanded edition of the Handbook of Ethological Methods provides a complete step by step introduction to ethological methods from topic choice and behavioral description to data collection and statistical analysis This book will be a must for beginning students and experienced researchers studying animal behavior in the field or laboratory Research Techniques in Animal Ecology Luigi Boitani,Todd Fuller,2000-06-01 The present biodiversity crisis is rife with opportunities to make important conservation decisions however the misuse or misapplication of the methods and techniques of animal ecology can have serious consequences for the survival of species Still there have been relatively few critical reviews of methodology in the field This book provides an analysis of some of the most frequently used research techniques in animal ecology identifying their limitations and misuses as well as possible solutions to avoid such pitfalls In the process contributors to this volume present new perspectives on the collection analysis and interpretation of data Research Techniques in Animal Ecology is an overarching account of central theoretical and methodological controversies in the field rather than a handbook on the minutiae of techniques The editors have forged comprehensive presentations of key topics in animal ecology such as territory and home range estimates habitation evaluation population viability analysis GIS mapping and measuring the dynamics of societies Striking a careful balance each chapter begins by assessing the shortcomings and misapplications of the techniques in question followed by a thorough review of the current literature and concluding with possible solutions and suggested guidelines for more robust investigations
