Political Islam, World Politics and Europe Bassam Tibi,2008-03-25 Is political Islam compatible

with democracy The rise of political Islam as a force in world politics has prompted questions and theories concerning its nature and compatibility with democratic values Not least have been discussions and conflicts within Islamic communities particularly in Europe where choices of identity and allegiance are growing acute Bassam Tibi provides a broad ranging assessment of political Islam in the world in all its various manifestations In particular he focuses on Europe which is also home to a significant Islamic minority Whilst rejecting the Clash of Civilizations theory the author clearly demonstrates the growing conflict and incompatibility between Islamist movements and European democracy A practicing Muslim himself Bassam Tibi makes clear the vital importance of developing a Euro Islam that will peacefully accommodate religious beliefs within an inclusive democratic European culture Security in 21st Century Europe Andrew Cottey,2012-11-19 Fully revised and updated the second edition of this leading textbook provides a systematic assessment of security in contemporary Europe The book examines the changing character of security and assesses the extent of the threats posed by different challenges as well as the policy dilemmas involved in responding to these concerns The nature of security in Europe has been transformed in recent years Andrew Cottey argues that this is a result of two key developments the emergence of a security community a zone of peace where war is inconceivable across much of Europe and the presence of new security threats such as terrorism and energy dependence Set in the context of the rising power of non Western states and the continuing fall out from the global economic crisis this text provides a comprehensive analysis of Europe s new security challenges Europe s traditional problem of war between states is being displaced by a new and equally daunting set of security challenges While major war within Europe remains unlikely the 2008 Georgia war and the 2011 Libya war were reminders that violent conflicts are still prevalent on Europe s periphery and can pose major challenges for European governments NATO and the EU At the same time terrorism nuclear proliferation as well as non military problems like mass migration and climate change threaten Europe s security This text is the perfect companion for advanced undergraduate and Master s level courses on European security whether within courses in Security studies European studies or International Relations New to this Edition New framework for analysing European security Highly topical issues covered including Arab Spring rise of BRIC countries terrorism and European energy dependence **The European Home** Falk Pingel,Michail Boitsev,Georg-Eckert-Institut für Internationale Schulbuchforschung,Council of Europe,Council of Europe. Council for Cultural Co-operation,2000-01-01 This study is based upon a cross section of secondary school history textbooks from fourteen european countries with differing traditions of educational literature the Czech Republic England and Wales Finland France Lithuania Germany Hungary Italy the Netherlands Norway Poland the Russian Federation and Spain Examples from other countries are also discussed in particular some of the Balkan countries where the parallel process of building a national identity while also establishing a European one is taking place CoE website **Unleashing Social Justice through EU Public Procurement** Antoinette Calleja,2015-10-05 The dramatic results of the 2014 European Parliament elections have highlighted the European Union s

urgent need for a review of the scope and purpose of its social objectives and for a reordering of European priorities This book advocates a radical and original alternative to the current philosophy that determines the set of rules for the awarding of EU public procurement contracts It calls for a reordering of the EU s economic and social priorities In doing so it advocates for a social dimension to be placed at the core of public procurement which could elicit a social model of integration in the EU in which the European citizen is the key actor This is achieved through an analytical approach as well as concise and contextualised explanations relating to free trade theories poverty and public interest theories This book will be of key interest to students and scholars of the European Union political theory and EU law

**The Human City** Joel Kotkin, 2016-04-12 The author of The Coming of Neo Feudalism and The New Class Conflict challenges conventions of urban planning Around the globe most new urban development has adhered to similar tenets tall structures small units and high density In The Human City Joel Kotkin called America s uber geographer by David Brooks of the New York Times questions these nearly ubiquitous practices suggesting that they do not consider the needs and desires of the vast majority of people Built environments Kotkin argues must reflect the preferences of most people even if that means lower density development The Human City ponders the purpose of the city and investigates the factors that drive most urban development today Armed with his own astute research a deep seated

knowledge of urban history and a sound grasp of economic political and social trends Kotkin pokes holes in what he calls the retro urbanist ideology and offers a refreshing case for dispersion centered on human values This book is not anti urban but it does advocate a greater range of options for people to live the way they want at all stages of their lives Praise for The Human City Kotkin presents the most cogent evidence based and clear headed exposition of the pro suburban argument In pithy readable sections each addressing a single issue he debunks one attack on the suburbs after another But he does more than that He weaves an impressive array of original observations about cities into his arguments enriching our understanding of what cities are about and what they can and must become Shlomo Angel Wall Street Journal The most eloquent expression of urbanism since Jane Jacobs s The Death and Life of Great American Cities Kotkin writes with a strong sense of place he recognizes that the geography and traditions of a city create the contours of its urbanity Ronnie Wachter Chicago Tribune

**Environmental Health Perspectives** ,1993 *European Disunion* Stefan Auer,2022-07-15 The European Union means many different things to its many peoples In Germany for example the European project was conceived mainly as post national or even post sovereign In France by contrast President Emmanuel Macron has pursued the vision of a sovereign Europe that is an EU that would become a formidable geopolitical actor Yet instead Europe has struggled to ascertain its values abroad and even domestically facing a sovereignist rebellion from its newer member states such as Hungary and Poland and the departure of Britain The eurozone crisis has undermined the EU s economic credentials the refugee crisis its societal cohesion the failure to stand up to Russia its sense of purpose and the Covid 19 pandemic its credibility as a protector of European citizens The key argument of this book is that the multiple crises of the European project are caused by one underlying factor its bold attempt to overcome the age of nation states Left unchecked supranational institutions tend to become ever more bureaucratic eluding control of the people they are meant to serve The logic of technocracy is thus pitted against the democratic impulse which the European Union is supposed to embody Democracy in Europe has suffered as a result The World Tomorrow ,1919 **Eastern European Capitalism in the Making** Elena A. Iankova,2002-09-09

Publisher Description **New Political Economy of Energy in Europe** Jakub M. Godzimirski,2018-09-21 This edited collection details and analyses the dramatic changes that the international political economy of energy has undergone in the past decade This change began with the increasing assertiveness of Russia when the oil price rose above the 100 mark in 2008 This combined with the rise of shale oil and gas made the USA all but self sufficient in terms of fossil fuels The collapse of the oil price in 2014 15 Saudi Arabia s new strategy of defending its market share and the increasingly tense and controversial relationship between the West and Russia all worked to further strengthen the geopolitical dimension of energy in Europe The global result is a world in which geopolitics play a bigger part than ever before the central question the authors of this volume grapple with is how the EU and European small states can deal with this Chapter 4 of this book is available open access under a CC BY 4 0 license at [link.springer.com](https://link.springer.com) **Europe's Union in Crisis** Brigid Laffan,2018-10-18

The European Union faces a set of inter related crises that it struggles to contain and address By exploring how the EU responds to crises and conflict this volume addresses both its resilience and vulnerability The EU faces significant challenges European integration is increasingly politicised democratic politics within member states are increasingly volatile challenger parties threaten the status quo and party systems are shifting throughout Europe These crises test both the EU and individual states especially those that had to exchange interdependence in the Union for dependence on the Troika Despite the tension of hard times this volume points to patterns of continuity and change as the single market somewhat side lined and forgotten in the heat of crises retains its role as the hard core of the Union and the EU s most significant achievement This book was originally published as a special issue of West European Politics      Policy-making in the European Union Helen Wallace, Mark A. Pollack, Christilla Roederer-Rynning, Alasdair R. Young, 2020 Policy making in the EU has far reaching implications for the EU s member states and citizens and for the wider world It is constantly evolving as part of this ongoing experiment in the collective governance of a multinational continent The eighth edition of this comprehensive text explores the processes institutions and modes through which policy is made before looking at key individual policies in detail New to this Edition Detailed assessments of the implications of politicization for European policy making Evaluation of the emerging consequences of the UK s departure on EU policy making New chapters on the EU s digital policy and development policy Coverage of the 2015 surge in migrants to the EU the Covid 19 pandemic and the America First foreign policy of the Trump administration Book jacket      *Multicultural Citizenship of the European Union* Juan Delgado-Moreira, 2018-02-06 This title was first published in 2000 This text deals with two intertwined dimensions of multicultural citizenship of the European Union It studies the theoretical debate over how best to reconcile multiculturalism citizenship and the need for collective identity at the European Union EU level by comparing EU citizenship with cultural citizenship and multicultural studies in the United States In addition to this through the study of EU documents the author contends that there exists such a thing as policies of multicultural citizenship at the European Union level He then goes on to analyze their key aspects such as the pursuit of symbolic forms of multiculturalism and the arguments to support affirmative action policies for women The text also examines the steps taken by certain EU institutions towards creating European identity and improving awareness of citizenship and cultural heritage while meeting the test of subsidiarity The author concludes that there are competing discourses in EU institutions concerning the best model for EU citizenship Among other concepts they construe multiculturalism and transnationalism as contested and sometimes opposing interpretations of citizenship The text goes on to reveal a lack of substantive connection between EU citizenship and identity in the European Union as well as the artificiality of EU attempts to build it anew It concludes that a plurality of cultural constructions of EU citizenship within the wider framework of liberal culturalism may be a viable model of EU citizenship
