Q Tasks, 2nd Edition Koechlin, Carol, Zwaan, Sandi, 2014-10-01 Questions and questioning are key skills in successful learning. The original Q Tasks was instrumental in showing teachers how to give students the tools they need to develop their own questions and build critical thinking and inquiry skills. This new totally revised edition continues to nurture and advance these crucial skills and also offers Q task extensions that introduce digital components that facilitate collaboration and are designed to appeal to tech savvy students. More than 100 practical flexible exercises in this remarkable book provide a smorgasbord of choices for teachers to use to help students formulate good questions in an information rich environment. They put the students at the centre of their own learning as they build the library and research skills that are essential to our information age. Teachers will find innovative ways to help students go beyond memorization and rote learning of facts to focus on personal understanding and true ownership of the learning experience. **Mapping Cyberspace** Martin Dodge, Rob Kitchin, 2003-09-02 Mapping Cyberspace is a ground breaking geographic exploration and critical reading of cyberspace and information and communication technologies. The book provides an understanding of what cyberspace looks like and the social interactions that occur there. It explores the impacts of cyberspace and information and communication technologies on cultural, political and economic relations, charts the spatial forms of virtual spaces, details empirical research and examines a wide variety of maps and spatialisations of cyberspace and the information society. It has a related website at <http://www.MappingCyberspace.com>. This book will be a valuable addition to the growing body of literature on cyberspace and what it means for the future. *Hands-On Social Studies, Grade 6* Jennifer Lawson, 2005 This teacher resource offers a detailed introduction to the program which includes its guiding principles, implementation guidelines, an overview of the social studies skills that grade 6 students use and develop, and a classroom assessment plan complete with record keeping templates and connections to the Achievement Levels outlined in the Ontario Social Studies Curriculum. This resource has two instructional units: Unit 1 First Nation Peoples and European Explorers; Unit 2 Canada's Links to the World. Each unit is divided into lessons that focus on specific curricular expectations. Each lesson has materials lists, activity descriptions, questioning techniques, activity centre and extension ideas, assessment suggestions, activity sheets and visuals. *An Environmental History of Canada* Laurel Sefton MacDowell, 2012-07-31 Traces how Canada's colonial and national development contributed to modern environmental problems such as urban sprawl, the collapse of fisheries and climate change. Includes over 200 photographs, maps, figures and sidebar discussions on key figures, concepts and cases. Offers concise definitions of environmental concepts. Ties Canadian history to issues relevant to contemporary society. Introduces students to a new dynamic approach to the past. Throughout history, most people have associated northern North America with wilderness, with abundant fish and game, snow capped mountains and endless forest and prairie. Canada's contemporary picture gallery, however, contains more disturbing images: deforested mountains, empty fisheries and melting ice caps.

Adopting both a chronological and thematic approach Laurel MacDowell examines human interactions with the land and the origins of our current environmental crisis from first peoples to the Kyoto Protocol This richly illustrated exploration of the past from an environmental perspective will change the way Canadians and others around the world think about and look at Canada

established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume II is devoted to Cultures and Power opening with chapters on philosophy science art and architecture music and the Enlightenment Subsequent sections examine Europe beyond Europe with the transformation of contact with other continents during the first global age and military and political developments notably the expansion of state power
