*Friday's Footprint* Leslie Brothers, 2001-10-11 A psychiatrist who has received international recognition for her research on the neural basis of primate social cognition Leslie Brothers M D offers here a major argument about the social dimension of the human brain drawing on both her own work and a wealth of information from research laboratories neurosurgical clinics and psychiatric wards Brothers offers the tale of Robinson Crusoe as a metaphor for neuroscience's classic and flawed notion of the brain a starkly isolated figure working praying writing alone But the famous castaway of literature she notes came from society and returned to society So too with our brains they have evolved a specialized capacity for exchanging signals with other brains they are designed to be social This can be seen in the brain's sensitive attunement to the meanings of facial expressions and physical gestures and the way it assigns mental lives to physical bodies a feat we too often take for granted Brothers describes fascinating case studies that show that certain kinds of brain damage can destroy a patient's ability to interpret faces leaving him or her with the sense that they are surrounded by zombies She takes us down to the level of the individual neuron exploring the response of brain cells to social events Perhaps most important she connects neuroscience psychiatry and sociology as never before showing how our daily interaction creates an organized social world a network of brains that generates meaningful behavior and thought Our emotions and our sense of self have no existence outside of a social context Brothers conducts her argument with grace and style By broadening our approach to the brain this groundbreaking book makes an important contribution to our understanding of the human mind

Strained Peace: Northern Ireland from Good Friday to Brexit Amanda Hall, 2024-09-30 As the United Kingdom continues to grapple with the aftermath of Brexit one corner of the Union has remained caught in the crosshairs Northern Ireland has been the subject of renewed scrutiny since 2016 as efforts to leave the European Union come up against the terms of the Good Friday Agreement and threaten the region's hard won peace The reasons for these challenges can be traced back to the Agreement itself as the negotiated settlement and its immediate aftermath set in place a strained peace This book examines the function and dysfunction of peace after 1998 to explain why its endurance cannot be taken for granted Strained peace stands apart from the traditional peace violence binary Structures of conflict and patterns of division are reiterated in the structures of peace Tensions might relax just as they might be inflamed by new challenges but the threat of a return to violence is never fully gone This book explores how such a condition developed between Good Friday and Brexit addressing variations in the quality of peace in the insecurity of official structures at Stormont the shifting role of community groups and the third sector and the adaptation of culture as a culture war replaced physical violence on the streets
