Fake Es Falsely Atributed English Edition:

Understanding Origins Francisco J. Varela, J.P. Dupuy, 2013-03-09 The main intention of this book is to bring together contributions from biology cognitive science and the humanities for a joint exploration of some of the main contemporary notions dealing with the understanding of origins in life mind and society The question of origin is inseparable from a web of hypotheses that both shape and explain us Although origin invites examination it always seems to elude our grasp Notions have always been produced to interpret the genesis of life mind and the social order and these notions have all remained unstable in the face of theoretical and empirical challenges In any given period the central ideas on origin have had a mutual resonance frequently overlooked by specialists engaged in their own particular fields As a consequence this book should be of interest to a wide audience In particular for all those engaged in the social sciences and the philosophy of science it is a unique document since bridges to the natural sciences in a mutually illuminating way are hard to find Whether as a primary source or as inspirational reading we feel this book has a place in every library The material comes from an international meeting held in September 13-16 1987 at Stanford University organized by F Varela and J P Dupuy at the request of the Program of Interdisciplinary Research of Stanford University We are grateful to Rene Girard the Program Director for making it possible with the help of the Mellon Foundation

Contemporary Perspectives on the Detection, Investigation and Prosecution of Art Crime Duncan Chappell, Saskia Hufnagel, 2016-05-13 In the world of law enforcement art and antiquity crime has in the past usually assumed a place of low interest and priority That situation has now slowly begun to change on both the local and international level as criminals encouraged in part by the record sums now being paid for art treasures are now seeking to exploit the art market more systematically by means of theft fraud and looting In this collection academics and practitioners from Australasia Europe and North America combine to examine the challenges presented to the criminal justice system by these developments Best practice methods of detecting investigating prosecuting and preventing such crimes are explored This book will be of interest and use to academics and practitioners alike in the areas of law crime and justice
