Poison Powder Gregory S. Wilson, 2023-04 In 1975 workers at Life Science Products a small makeshift pesticide factory in Hopewell Virginia became ill after exposure to Kepone the brand name for the pesticide chlordecone They made the poison under contract for a much larger Hopewell company Allied Chemical Life Science workers had been breathing in the dust for more than a year Ingestion of the chemical made their bodies seize and shake News of ill workers eventually led to the discovery of widespread environmental contamination of the nearby James River and the landscape of the small working class city Not only had Life Science dumped the chemical but so had Allied when the company manufactured it in the 1960s and early 1970s The resulting toxic impact was not only on the city of Hopewell but also on the faraway fields where Kepone was used as an insecticide Aspects of this environmental tragedy are all too common corporate avarice ignorance and regulatory failure combined with race and geography to determine toxicity and shape the response But the Kepone story also contains some surprising medical legal and political moments amid the disaster With *Poison Powder* Gregory S Wilson explores the conditions that put the Kepone factory and the workers there in the first place and the effects of the poison on the people and natural world long after 1975 Although the manufacture and use of Kepone is now banned by the Environmental Protection Agency organochlorines have long half lives and these toxic compounds and their residues still remain in the environment

Undermining Racial Justice Matthew Johnson, 2020-04-15 Over the last sixty years administrators on college campuses nationwide have responded to black campus activists by making racial inclusion and inequality compatible This bold argument is at the center of Matthew Johnson s powerful and controversial book Focusing on the University of Michigan often a key talking point in national debates about racial justice thanks to the contentious Gratz v Bollinger 2003 Supreme Court case Johnson argues that UM leaders incorporated black student dissent selectively into the institution s policies practices and values This strategy was used to prevent activism from disrupting the institutional priorities that campus leaders deemed more important than racial

justice Despite knowing that racial disparities would likely continue Johnson demonstrates that these administrators improbably saw themselves as champions of racial equity What Johnson contends in *Undermining Racial Justice* is not that good intentions resulted in unforeseen negative consequences but that the people who created and maintained racial inequities at premier institutions of higher education across the United States firmly believed they had good intentions in spite of all the evidence to the contrary The case of the University of Michigan fits into a broader pattern at elite colleges and universities and is a cautionary tale for all in higher education As Matthew Johnson illustrates inclusion has always been a secondary priority and as a result the policies of the late 1970s and 1980s ushered in a new and enduring era of racial retrenchment on campuses nationwide *The Secret Horsepower Race* Calum E. Douglas, 2020-12-02 The piston engines that powered Second World War fighters the men who designed them and the secret intelligence work carried out by both Britain and Germany would determine the outcome of the first global air war Advanced jet engines may have been in development but every militarily significant air battle was fought by piston engined fighters Whoever designed the most powerful piston engines would win air superiority and with it the ability to dictate the course of the war as a whole This is the never before told story of a high tech race hidden behind the closed doors of design offices and intelligence agencies to create the war's best fighter engine Using the fruits of extensive research in archives around the world together with the previously unpublished memoirs of fighter engine designers author Calum E Douglas tells the story of a desperate contest between the world's best engineers the Secret Horsepower Race **Airships** Iver P. Cooper, 2025-05-15 Many people may know about the blazing crash of the Hindenburg in 1937 but are possibly unaware that it had made 62 flights before its final journey including one transporting author Leslie Charteris creator of *The Saint* The disaster however did not end the airship era blimps escorted convoys during World War II and were a part of air defense systems in the 1950s and 1960s Airships still fly today and new models are in the construction phase This book examines this branch of aviation history delving into the science and engineering of airships and their design flaws weather difficulties and operational errors The chapters focus on function lift propulsion materials ground handling and so forth The book concludes with speculations about future airship designs and missions *Children of the Northern Forest* Jamie Sayen, 2023-10-31 This no holds barred narrative of the failure of conservation in northern New England's forests envisions a wilder more equitable lower carbon future for forest dependent communities Jamie Sayen approaches the story of northern New England's undeveloped forests from the viewpoints of the previously unheard the forest and the nonhuman species it sustains the First Peoples and in more recent times the disenfranchised human voices of the forest including those of loggers mill workers and citizens who like Henry David Thoreau wish to speak a kind word for nature From 1988 to 2016 paper companies sold their timberlands and closed seventeen paper mills in northern New England Policy makers ceded veto power to large absentee landowners who tried to preserve the status quo by demanding additional tax cuts and other subsidies for economic elites They vetoed measures

designed to restore and preserve forest health at present about half of the former industrial forests are classified as degraded and the regional economy continues to be trapped in low value commodity markets This book operates as a case study of how a rural resource region can respond to a global economy responsible for climate change habitat loss and degradation and environmental injustice Sayen offers a blueprint for restoring vast wildlands and transitioning to a lower carbon high value adding local economy while protecting the natural rights of humans nonhumans and unborn generations

The Deserters Charles Glass, 2013-06-13 Powerful and often startling The Deserters offers a provokingly fresh angle on this most studied of conflicts The Boston Globe A groundbreaking history of ordinary soldiers struggling on the front lines The Deserters offers a completely new perspective on the Second World War Charles Glass renowned journalist and author of the critically acclaimed Americans in Paris Life and Death Under Nazi Occupation delves deep into army archives personal diaries court martial records and self published memoirs to produce this dramatic and heartbreaking portrait of men overlooked by their commanders and ignored by history Surveying the 150 000 American and British soldiers known to have deserted in the European Theater The Deserters A Hidden History of World War II tells the life stories of three soldiers who abandoned their posts in France Italy and Africa Their deeds form the backbone of Glass's arresting portrait of soldiers pushed to the breaking point a sweeping reexamination of the conditions for ordinary soldiers With the grace and pace of a novel The Deserters moves beyond the false extremes of courage and cowardice to reveal the true experience of the frontline soldier Glass shares the story of men like Private Alfred Whitehead a Tennessee farm boy who earned Silver and Bronze Stars for bravery in Normandy yet became a gangster in liberated Paris robbing Allied supply depots along with ordinary citizens Here also is the story of British men like Private John Bain who deserted three times but never fled from combat and who endured battles in North Africa and northern France before German machine guns cut his legs from under him The heart of The Deserters resides with men like Private Steve Weiss an idealistic teenage volunteer from Brooklyn who forced his father a disillusioned First World War veteran to sign his enlistment papers because he was not yet eighteen On the Anzio beachhead and in the Ardennes forest as an infantryman with the 36th Division and as an accidental partisan in the French Resistance Weiss lost his illusions about the nobility of conflict and the infallibility of American commanders Far from the bright picture found in propaganda and nostalgia the Second World War was a grim and brutal affair a long and lonely effort that has never been fully reported to the detriment of those who served and the danger of those nurtured on false tales today Revealing the true costs of conflict on those forced to fight The Deserters is an elegant and unforgettable story of ordinary men desperately struggling in extraordinary times
