Name _____ Date _____

Hale and Kipp

On the night of July 23, 1844, a man named Thomas Kipp was observing the night sky in Arkansas through a telescope. He had already watched the sky with the telescope. Kipp noticed a faint glow that he had never seen before. He asked a friend who was with him to look at the new star. They found the new star was about to appear. But the glow was not on the chart.

The day was night in New Mexico. Hale Kipp went outside to look at the night sky through his telescope, as he often did.

It was a very clear night. Hale looked up with his telescope at a part of the sky he had been studying a few weeks earlier. Suddenly, he noticed a mystery. He had noticed something new. Hale had seen a faint, new glow. Kipp had made a quick sketch of what he saw. He believed he had just found a comet.

Hale and Kipp checked the new star. Hale Kipp had seen that the object was there. Quickly, Hale sent a message to a friend in Massachusetts that news of the comet. He told the people of the comet what he had seen.

Thomas Kipp also sent a message to the center in Massachusetts. The next morning, he heard back from the center. Kipp, Hale Kipp, had discovered a new comet.

Twelve hours after Hale and Kipp had first seen the comet, it had a name: Comet Hale Kipp.
