

## **ID Biology Extended Essay Information and Structuring**

The most important featured is a good research question to start with. From this your EE will grow into a solid argument. This is what it should be not merely a longer version of an IA. The question should not be able to be answered easily with information already available.

The best EE's will be linked to a local or global issue so that you can easily demonstrate why you have chosen them. It is possible to do a Science EE based entirely upon secondary data. This must however be considerable, being approached and analysed in a manner not found elsewhere.

If the topic to be looked at is of a well-documented nature it must be approached from a new perspective on the issue.

### **Structure and Presentation**

- Keep the argument focussed and regularly link back to your research question (RQ)
- The structure should be clear and flow logically
- There should be a title page, index and page numbers.
- Must be within the 4000 word limit (Tables are not counted in this unless they have large sections of text)
- Demonstrate clearly the application of sources and / or the method. Make clear connections to support the overall argument.
- Use scientific terminology but avoid unnecessary jargon.
- Explain technical terms used.
- Maintain linguistic style throughout and avoid first person.
- All units should be SI and significant figures used are to be consistent.

### **Context and Background**

- State a clear and focussed research question.
  - Can it be answered in the word limit?
  - Is it clear?
  - Is it a biological question and not better explored through another subject?
- Present a clear context – why this topic?
- Background theory detailed but relevant.
- Clearly state a hypothesis and explain it.
- If you will be carrying out statistical tests you should also state a null hypothesis here.
