Wenguang Wang, Xixin Wang, Chao Liu, Yongqiang Chen, Yihuai Zhang, 2025-04-09 Download the ebooks for this Research Topic Volume I A PDF EPUB Volume I B PDF EPUB With the deepening of theoretical understanding and the progress of exploration and development techniques a series of major breakthroughs have been made in the global exploration and development of unconventional oil and gas Global unconventional oil and gas production is growing rapidly and its role in global energy supply is becoming increasingly prominent Unconventional oil and gas reservoirs have poor physical properties generally with porosities of 2% 10% and permeabilities of 0.001–1.10 $\times 10^{-3}$ mD The basic types include tight sandstone mud shale tight carbonate etc Unconventional oil and gas resources are very rich and it is necessary to conduct in depth research on provenance analysis sediment transport reservoir evaluation and geo energy The purpose of this Research Topic is to provide operational evaluation ideas for unconventional resource prediction through the study of unconventional reservoir provenance analysis sediment transport reservoir evaluation and geo energy and ultimately serve oil and gas exploration practice The different provenance controls the distribution of sedimentary facies in the vertical and lateral directions which in turn control the spatial distribution of the grain size and clastic composition The study of provenance analysis and sediment transport can integrate tectonics climate provenance lithotypes transport dynamics and burial diagenesis which can provide a comprehensive understanding of unconventional reservoirs The modelling of unconventional reservoirs is mainly aimed at reservoirs with original reservoirs tight and generally no natural industrial output requiring artificial reconstruction a large number of horizontal wells or branch wells and other targeted mining technologies to improve productivity The modeling of unconventional reservoir mainly uses horizontal well data Different from conventional reservoir modeling the modelling of unconventional reservoir involves sweet spot characterization and artificial fracture establishment This Research Topic will focus on provenance analysis sediment transport reservoir evaluation and geo energy of

unconventional reservoirs It will be primarily devoted to research papers and review papers Pioneering research papers in the field of experimental and numerical simulation are encouraged to submit their work The scope includes but are not limited to Provenance lithotype and sediment transport pathways Diagenesis and reservoir quality Diagenesis numerical simulation and seismic diagenetic facies Data processing and application Implication of machine learning and artificial intelligence to trace sediment transport Controlling effect of provenance on ore bearing reservoirs and deposits Formation mechanism of sedimentary type deposits iron uranium bauxite etc

The Geohistorical Approach Silvia Elena Piovan, 2020-05-14 This book gives a comprehensive view of the strengths and limits of the interdisciplinary methods that work together to form the geohistorical approach to geographical and geological sciences The geohistorical approach can be synthetically defined as a multi and interdisciplinary approach that uses techniques and perspectives mainly from geography history and natural sciences to examine topics that inform the space time knowledge of environment territory and landscape The boundary between the application of physical and human science methods is large and hazy This volume exists at this boundary and offers an approach that utilizes both historical data from both physical and human records and GIScience e g GIS cartography GPS remote sensing to investigate the evolution of the environment territory and landscape through both space and time The first objective of this volume is to define the term geohistorical approach An entire chapter focuses on a review of the main disciplines that connect geography and history a review of the terms environment territory and landscape as objects of study of this approach and the definition and importance of the geohistorical approach The second goal is to describe the methods used in the geohistorical approach Eight chapters present the key methods also using examples of applications from the international context offering an awareness of the potentials limitations and accuracy of each method with particular focus on the integration of methods The third goal is to provide case studies to demonstrate the use and integration of geohistorical methods from both original material and published research A final chapter is dedicated to an interdisciplinary case study from the Venetian Plain Italy providing an example of the integration of almost all methods described in the book

Geo-Regional Competitiveness in Central and Eastern Europe, the Baltic Countries, and Russia Zhuplev, Anatoly, Liuhto, Kari, 2014-05-31 The changing dynamics in the European region and beyond the unfolding political economic challenges across the European Union and the rising global power of emerging economic powers require knowledge skills and methodological platforms inducing strategies and operations in the new and ever changing business landscape Geo Regional Competitiveness in Central and Eastern Europe the Baltic Countries and Russia seeks to address East Central Europe s ECE the Baltics and Russia s increasingly important roles as emerging markets and competitive economic players in the European region This premier reference work

is designated for scholars professionals government agencies think tanks and other individuals organizations and institutions interested in gaining a deeper understanding of the geo regional strategic business dynamics and landscape involving ECE the Baltics and Russia *Protection of Materials and Structures from the Space Environment* Jacob Kleiman,2017-05-16 The proceedings published in this book document and foster the goals of the 11th International Space Conference on Protection of Materials and Structures from Space Environment ICPMSE 11 to facilitate exchanges between members of the various engineering and science disciplines involved in the development of space materials Contributions cover aspects of interaction with space environment of LEO GEO Deep Space Planetary environments ground based qualification and in flight experiments as well as lessons learned from operational vehicles that are closely interrelated to disciplines of atmospheric sciences solar terrestrial interactions and space life sciences **The Web as History** Niels Brügger,Ralph Schroeder,2017-03-06 The World Wide Web has now been in use for more than 20 years From early browsers to today s principal source of information entertainment and much else the Web is an integral part of our daily lives to the extent that some people believe if it s not online it doesn t exist While this statement is not entirely true it is becoming increasingly accurate and reflects the Web s role as an indispensable treasure trove It is curious therefore that historians and social scientists have thus far made little use of the Web to investigate historical patterns of culture and society despite making good use of letters novels newspapers radio and television programmes and other pre digital artefacts This volume argues that now is the time to ask what we have learnt from the Web so far The 12 chapters explore this topic from a number of interdisciplinary angles through histories of national web spaces and case studies of different government and media domains as well as an introduction that provides an overview of this exciting new area of research **Dictionary Catalog of the Oriental Collection** New York Public Library. Research Libraries,New York Public Library. Reference Department,1976 **Survive the IB!** Nathan Taber,2011 **Sketch Maps: Drawing the Geographical Imagination** Carla Lois,2023-05-25 Sketch maps despite their intuitive informal appearance and seemingly na ve use are intellectual devices and efficient tools that shape the geographical imagination regardless of the drawing skills of their makers By delineating the silhouettes of nations we express territorial knowledge and geopolitical stereotypes that although shaped at school from an early age organized the way we interact with the world why do we still need to draw maps What is behind our common and naturalized practice of sketching maps This innovative book deciphers why and how the intuitive mechanisms behind sketch mapping activate multiple conscious and unconscious knowledges about place and space **Routledge Handbook of Industry and Development** John Weiss,Michael Tribe,2015-09-16 The Routledge Handbook of Industry and Development is a global overview of industrialisation Each chapter will provide readers with contemporary insights into this this essential aspect of economic development Industrialisation has been at the forefront of discussion on economic development since the earliest days of development economics But over the last fifty years the manufacturing sectors of

different countries and regions have grown at strikingly different rates In 1960 developing countries took a very small share of global manufacturing production Today the position had changed radically with fast growth of manufacturing in many parts of what was originally the developing world particularly in China and the rest of East Asia On the other hand countries in Africa and parts of Latin America have been largely left behind by this process of industrialisation This volume aims to illuminate this uneven development and takes stock of the current issues that hinder and support industrialisation in low and middle income economies This Handbook is a collection of chapters on different aspects of industrialisation experience in a range of countries Key themes include the role of manufacturing in growth the nature of structural change at different stages of development the role of manufacturing in employment creation alternative options for trade and industrial policy the key role of technology and technical change and the impact of globalisation and the spread of global value chains and foreign direct investment on prospects for industrialisation Several chapters discuss individual country experiences with examples from India Mexico South Africa and Tanzania as well as an overview of African industrialisation This authoritative Handbook will be a key reference source for those studying or wishing to understand contemporary economic development Offering inspiration and direction for future research this landmark volume will be of crucial importance to all development economics scholars and researchers

Beyond Timbuktu Ousmane Oumar Kane, 2016-06-07 Timbuktu is famous as a center of learning from Islam's Golden Age Yet it was one among many scholarly centers to exist in precolonial West Africa Ousmane Kane charts the rise of Muslim learning in West Africa from the beginning of Islam to the present day and corrects lingering misconceptions about Africa's Muslim heritage and its influence
