*The Bedford Guide for College Writers with Reader, Research Manual, and Handbook* X. J. Kennedy, Dorothy M. Kennedy, Marcia F. Muth, 2011-01-06 With its process oriented rhetoric provocative thematic reader up to date research manual and comprehensive handbook *The Bedford Guide for College Writers* gives your students the tools they need to succeed as writers all in one book Each of the book's four main components has been carefully developed to provide an engaging well coordinated guide for student writers This edition's new more open design and sharper focus on active learning do even more to help students develop transferable skills *The Bedford Guide for College Writers* prepares students to be the confident resourceful and independent writers they will need to be [Handbook of Research Methods for Tourism and Hospitality Management](#) Robin Nunkoo, 2018-07-27 As research in tourism and hospitality reaches maturity a growing number of methodological approaches are being utilized and in addition this knowledge is dispersed across a wide range of journals Consequently there is a broad and multidisciplinary community of tourism and hospitality researchers whom at present need to look widely for support on methods In this volume researchers fulfil a pressing need by clearly presenting methodological issues within tourism and hospitality research alongside particular methods and share their experiences of what works what does not work and where challenges and innovations lie [The Prisoner's Release](#) Keith Soothill, 2023-10-25 For well over one hundred years society had considered ways of helping prisoners on their release from prison but there had been no serious attempt to assess in a scientific manner the value of such efforts Originally published in 1974 this book broke with this tradition and was the first full scale work published in this country evaluating carefully whether an active policy of finding suitable employment for men immediately on their release from prison had beneficial results The first part of the book discusses the historical development of prison after care from its early origins in the nineteenth century and indicates how up to the Second World War the primary object of after care had been regarded as the reinstatement of the ex prisoners in employment Gradually the specific task of finding jobs for ex prisoners had become a peripheral activity considered as the responsibility of the Department of Employment The effectiveness of the Department's pre release procedure for prisoners is discussed The rest of the book considers the fascinating Apex project set up to examine the effectiveness of finding work for ex prisoners The work of Apex continued to develop and expand but the present study considers the first five years when over four hundred men were randomly selected from two London prisons and offered the services of a specialist employment agency The outcome for these men is compared with a control group of over three hundred men randomly selected from the same prisons This study is concerned with the general run of the prison population and interestingly shows how some prisoners accept and others reject the offer of an employment service It further indicates the enormous efforts sometimes needed to find suitable employment for prisoners on release The outcome of the job interviews arranged in terms of the proportions attending the interviews starting the jobs and the length of time men

stayed in the jobs arranged is vital reading for anyone involved in after care. An important part of the work is the examination of the subsequent reconviction rates for the various groups of offenders and the implication that it seems possible to predict men who are unlikely to be helped by the simple provision of employment on release. The final chapter considers critically some of the assumptions upon which the Apex project was based and the possible use of computer techniques in the individualization of treatment is briefly discussed. The author was particularly well qualified to discuss this subject for apart from his work over a number of years with several after care organizations the present project involved working in prisons for over three years as well as interviewing and talking to men after their release. The findings of this study will interest the wide variety of people concerned with prison after care. Criminologists, sociologists, probation officers and all others working in prisons and after care will recognize the important implications of the material presented in this book.

**Handbook of Technology Application in Tourism in Asia** Azizul Hassan, 2022-07-09. It is an undisputed reality that the tourism industry in Asia is getting exposed to more innovative technologies than ever before. This proposed book provides the latest research in the application of innovative technology to the tourism industry covering the perspectives, innovativeness, theories, issues, complexities, opportunities and challenges. This book is a blend of comprehensive and extensive effort by the contributors and editors, designed to cover the application and practice of technology in tourism including the relevant niches. This book focuses on the importance of technology in tourism. This also highlights in a comprehensive manner specific technologies that are impacting the tourism industry in Asia as well as the constraints the industry is facing. The contents of this book deal with distinct topics such as mobile computing, new product designs, innovative technology usages in tourism promotion, technology driven sustainable tourism development, location based apps, mobility, accessibility and so on. A good number of research studies have conducted outlining the contributions and importance of technologies in tourism in general. However, the tourism industry of Asia so far has attracted very few researchers. Some contributions have been made but not sufficient. Considering the ongoing trend of technology application in the tourism industry in Asia, very few research attempts have been made aiming to explore diverse aspects. Tourism is expanding enormously across the world which actually creates more demands for effective technologies. This book will be a reading companion especially for tourism students in higher academic institutions. This book will also be read by the relevant policy planners and industry professionals. Apart from them, this book will be appreciated by expatriate researchers and researchers having keen interest in the Asian tourism industry.
