Remove the operator's cab.

See ["Removing the Operator's Cab"](#), Section 90, Group 00.

 CAUTION:

If frame attaching screws are loosened or frame is removed, make certain all parts are reinstalled correctly to maintain adequate protection of the operator. Tighten attaching screws to specified torque.

A tractor roll-over may place a severe stress on the frame structure. Therefore, replace frame if structural members have been bent, buckled or stretched to maintain adequate protection of the operator.

No welding, grinding, drilling or cutting of any type should be done on the frame structural members. Doing so may weaken the members sufficiently to limit their effectiveness in protecting the operator if a roll-over or upset should occur.
