**Testing iOS Apps with HadoopUnit** Scott Tilley, Krissada Dechokul, 2022-05-31  
Smartphone users have come to expect high quality apps  
This has increased the importance of software testing in mobile software development  
Unfortunately testing apps particularly the GUI can be very time consuming  
Exercising every user interface element and verifying transitions between different views of the app under test quickly becomes problematic  
For example execution of iOS GUI test suites using Apple's UI Automation framework can take an hour or more if the app's interface is complicated  
The longer it takes to run a test the less frequently the test can be run which in turn reduces software quality  
This book describes how to accelerate the testing process for iOS apps using HadoopUnit a distributed test execution environment that leverages the parallelism inherent in the Hadoop platform  
HadoopUnit was previously used to run unit and system tests in the cloud  
It has been modified to perform GUI testing of iOS apps on a small scale cluster a modest computing infrastructure available to almost every developer  
Experimental results have shown that distributed test execution with HadoopUnit can significantly outperform the test execution on a single machine even if the size of the cluster used for the execution is as small as two nodes  
This means that the approach described in this book could be adopted without a huge investment in IT resources  
HadoopUnit is a cost effective solution for reducing lengthy test execution times of system level GUI testing of iOS apps
