First-stage LISA Data Processing and Gravitational Wave Data Analysis Yan Wang, 2015-12-10 This thesis covers a diverse set of topics related to space based gravitational wave detectors such as the Laser Interferometer Space Antenna LISA The core of the thesis is devoted to the preprocessing of the interferometric link data for a LISA constellation specifically developing optimal Kalman filters to reduce arm length noise due to clock noise The approach is to apply Kalman filters of increasing complexity to make optimal estimates of relevant quantities such as constellation arm length relative clock drift and Doppler frequencies based on the available measurement data Depending on the complexity of the filter and the simulated data these Kalman filter estimates can provide up to a few orders of magnitude improvement over simpler estimators While the basic concept of the LISA measurement Time Delay Interferometry was worked out some time ago this work brings a level of rigor to the processing of the constellation level data products The thesis concludes with some topics related to the eLISA such as a new class of phenomenological waveforms for extreme mass ratio inspiral sources EMRIs one of the main source for eLISA an octahedral space based GW detector that does not require drag free test masses and some efficient template search algorithms for the case of relatively high SNR signals **Current Housing Reports** ,2003

Performance Analysis for Public and Nonprofit Organizations XiaoHu Wang, 2010 The book focuses on application of performance analysis tools not the theory of performance management This text is an effective learning tool for students in analytical technique courses in public administration and policy programs With other texts students may learn about a statistical concept and calculation but still don't understand the managerial context where the statistical tool applies Consequently they often fail to understand the managerial importance of statistical tools they learn and worse fail to recognize the correct tool to use when a managerial issue rises This book corrects this problem by providing a managerial context that bridges statistical concepts and the managerial reality The managerial context is performance management in which performance data are presented monitored and analyzed It is in this performance management context that the usefulness and applicability of statistical tools are illuminated for the learner **BOOK JACKET**
