The Cambridge History of American Women's Literature Dale M. Bauer, 2012-05-24. The field of American women's writing is one characterized by innovation; scholars are discovering new authors and works as well as new ways of historicizing this literature, rethinking contexts, categories, and juxtapositions. Now, after three decades of scholarly investigation and innovation, the rich complexity and diversity of American literature written by women can be seen with a new coherence and subtlety. Dedicated to this expanding heterogeneity, *The Cambridge History of American Women's Literature* develops and challenges historical, cultural, theoretical, even polemical methods, all of which will advance the future study of American women writers from Native Americans to postmodern communities, from individual careers to communities of writers and readers. This volume immerses readers in a new dialogue about the range and depth of women's literature in the United States and allows them to trace the ever-evolving shape of the field.

Raymond,2013-05-01 This nine chapter book narrates a writing centered approach to the teaching of literature and literary research As the title suggests the book also embraces a thematic approach to reading and writing about twentieth century American literature focusing on the grounds for hope in an age of despair The first five chapters explore in detail the

teaching of the twentieth century American literature course at the University of Pristina in Kosovo where the author served as Fulbright Professor of American Literature in the spring semester of 2012 Throughout these chapters narrate students in class interactions to illustrate writing to learn strategies for teaching the literature Chapter six then follows the same cohort of 22 students as they learned to ground their literary research in their own questions about American and Balkans narratives of oppression and liberty of despair and hope The last three chapters document the responses of students and their professors to this American theme of liberty and hope as seen through the Balkans lenses of ethnic violence and emerging republican government Specifically chapter seven focuses on students participation in a blog featuring Balkans literature that explores the same issues of liberty and justice examined in the American literature they have read Chapter eight then celebrates student writing the fruit of the writing to learn strategies narrated in earlier chapters Finally chapter nine narrates professors and students responses gathered through surveys and interviewing to questions about their country's violent past and the value of literary study in preparing citizens to shape a new republic

Georgetown University
Round Table on Languages and Linguistics (GURT) 1994: Educational Linguistics, Cross-Cultural Communication, and Global Interdependence James E. Alatis, 1995-03-03 The essays in this volume explore communication across cultures using an interdisciplinary approach to language teaching and learning mediated by the growing field of educational linguistics Topics include the use of English as a medium of wider communication and the growth of national varieties of English throughout the world An international array of distinguished contributors includes scholars from China Great Britain Hong Kong India Israel Nigeria Singapore Taiwan Ukraine and the United States This collection suggests that language diversity is a unifying force in a globally interdependent world Fiction Laurie G. Kirsznner, 1993-09-23 Includes the fiction section from Literature Reading Reacting Writing 2 e with three student papers and works by women minority non Western and contemporary authors Readings in Writing Courses Richard C. Raymond, 2010-12-01 As the title suggests this six chapter book responds to a question which in Western culture goes back to Plato Aristotle Cicero and Quintilian namely What should rhetoric teachers ask their students to read Primarily historical the first two chapters trace conflicting answers to the question above focusing on two constructive results of the debate the reinvention of rhetoric and writing as a discipline a coherent and growing body of knowledge and as a result the emergence of independent departments of writing free from departments of English free therefore to develop their own curriculum and to manage their own budgets Additionally the second chapter examines two destructive consequences of this debate the ban of literature from writing courses where students might profitably study both and as a result the often painful departmental splits which not only separate former colleagues but also cramp the pedagogy of those trained to teach both writing and literature More than a survey of key publications this chapter encourages readers to honor the discipline of rhetoric but to make a place for literature on their composition syllabi The next four chapters provide pedagogical support for these chief

claims that literature can and should be taught in writing courses and that such readings need not distract students from the primary text their own writing On the contrary these readings motivate serious writing when students feel invited into a conversation on issues that touch their lives These pedagogical chapters then move entering professionals from the theoretical debate to the application of theory therefore the book would serve well professors of courses in composition theory particularly those who enjoy teaching the conflicts and preparing their graduate students to design assignments and courses that apply theories of learning reading and composing
