Abstract: Ecosystem services are part and parcel of human lives. It is of paramount importance to understand the interaction between these ecosystem services, as they are directly related to human life. In the modern era, quantification of ecosystem services (ES) is playing an important role in the proper understanding and efficient management of social-ecological systems. Even though a significant amount of literature is available to present on the topic, there is a need to build an adequate amount of knowledge repository. Hence, a systematic literature review method is used, in which research question and searching stages are defined. This review study is conducted on ecosystem services and remote-sensing-related keywords in the Scopus database. After a systematic analysis of the papers retrieved from the Elsevier, Scopus database, MDPI, and open source, a total of 140 primary articles were categorized according to their relationship with other ecosystem services, land use, land cover, and planning management. Major issue findings and important aspects have been analyzed and reported in each category. With this analysis and developments in the existing literature, we have potential areas for future research. Findings pointed out that regional or local-level ecosystem services-related work is immensely important, and a hotspot of current research aiming to understand the variability and spatiotemporal dynamics in terrestrial and aquatic ecosystems.

Keywords: ecosystem services; provisioning ecosystem services; regulating ecosystem services; cultural ecosystem services; supporting ecosystem services

1. Introduction

The biophysical state of the ecosystem is affected by multiple elements and, simultaneously, by humans' ability to enjoy its services [1]. Furthermore, Anthropogenic and non-anthropogenic interventions can change the biochemical cycles and earth's energy equilibrium, in turn causing global warming, and future climate changes [2]. On the other hand, rapid urbanization degrades ecosystem services [1,3]. Gretchen, in his work, points out that the lifestyle of the people may be hampering the prosperity of ecological biodiversity at the expense of their descendants [4,5]. Talking about ecological biodiversity, the term ecosystem services is described by many authors as the process that helps to sustain human life, with the help of interaction between the natural ecosystem and the species [4,6]. Globally, human systems are supported by nature's contribution, i.e., ecosystem services, and [7,8] state that land use and land cover changes (LULC) induced by humans have increased over the last three decades, leading to changes from a natural setting to human-conquered land. Furthermore, according to Gómez-Baggethun & Barton [9] more than 50% of the world's inhabitants reside in urban areas and potentially receive benefits from the ecosystem services; the future projection of people living in urban areas is calculated to reach 66% by 2050. The main motive for this research is to find a way to conserve the existing ecosystem, with a background of arising global environmental issues.

Literature Review In Neco System:

Reimagining Nigeria's Educational System Joseph A. Balogun, 2023-09-20 This book assesses the challenges within the Nigerian educational system and provides a concrete plan to revitalize the low performing system by strengthening high stakes testing at all levels In Nigeria many citizens believe that the solution to the country's low performance in education is to eliminate high stakes standardized testing High stakes testing refers to applying standardized student achievement tests as a primary mechanism to evaluate students teachers and their school's performance This book argues that the poor quality of education and low ranking of Nigeria's educational system is not related to the negative consequences of high stakes testing but rather is due to many intrinsic factors By conducting a comparative analysis of six high performing education systems worldwide the book offers a comparative summative evaluation of the educational system and offers recommendations This book will be of interest to policymakers and scholars in the fields of African education higher education quality and global studies African studies management and administration leadership and professional development studies Joseph Abiodun Balogun is former Dean and retired Distinguished University Professor at the College of Health Sciences Chicago State University USA Visiting Professor Program Consultant at the Centre of Excellence in Reproductive Health Innovation University of Benin Nigeria and President CEO Joseph Rehabilitation Center Tinley Park Illinois USA

Artificial Intelligence in Healthcare Information Systems—Security and Privacy Challenges Narasimha Rao Vajjhala, Edlira Martiri, Fisnik Dalipi, Bian Yang, 2025-03-29 Artificial Intelligence AI in Healthcare Information Systems Security and Privacy Challenges offers a deep dive into the integration of AI in healthcare with a primary focus on addressing the significant security and privacy concerns that arise in this domain The chapters in this book highlight the transformative potential of AI in diagnosing and predicting diseases as well as its impact on fields like fetal medicine but places special emphasis on the need for robust encryption data protection techniques and ethical considerations to safeguard sensitive healthcare data The book also explores global case studies from India to Kazakhstan outlining the challenges and prospects of AI adoption in diverse healthcare settings Readers will gain insights into AI's role in improving patient outcomes while navigating the complexities of data privacy and security The book is a valuable resource for healthcare professionals technologists and policymakers who are focused on implementing AI driven solutions securely and ethically in healthcare systems

Advances in Data-Driven Computing and Intelligent Systems Swagatam Das, Snehanshu Saha, Carlos A. Coello

Coello, Jagdish C. Bansal, 2024-03-19 This book is a collection of best selected research papers presented at the International Conference on Advances in Data driven Computing and Intelligent Systems ADCIS 2023 held at BITS Pilani K K Birla Goa Campus Goa India during September 21-23, 2023. It includes state of the art research work in the cutting edge technologies in the field of data science and intelligent systems. The book presents data driven computing, it is a new field of computational analysis which uses provided data to directly produce predictive outcomes. The book is useful for academicians, research scholars and industry persons.

Handbook of Research on Quality and Competitiveness in the Healthcare Services Sector

Akkucuk, Ulas, 2023-03-24 It has become clear that managing and maintaining state of the art healthcare facilities is more important than ever before. Healthcare consists of many different institutions and supports personnel ranging from laboratories of universities, public and private hospitals, research centers of health institutions, public health institutes, institutions and organizations engaged in research and development in the field of medicine. For all these entities to be successful, there needs to be coordination among the bodies and quality must be kept at a very high level. The Handbook of Research on Quality and Competitiveness in the Healthcare Services Sector considers the current state of the healthcare services sector and examines future directions. Covering topics such as quality excellence, models, accreditation, and e health, this major reference work is an essential resource for economists, healthcare specialists, government officials, consultants, business leaders and executives, healthcare professionals, IT managers, students and educators of higher education, researchers and academicians.

The National Bibliography of Nigeria, 2004 *Handbook of Smart Energy Systems*

Michel Fathi, Enrico Zio, Panos M. Pardalos, 2023-08-04 This handbook analyzes and develops methods and models to optimize solutions for energy access for industry and the general world population alike in terms of reliability and sustainability. With a focus on improving the performance of energy systems, it brings together state of the art research on reliability enhancement, intelligent development, simulation and optimization, as well as sustainable development of energy systems. It helps energy stakeholders and professionals learn the methodologies needed to improve the reliability of energy supply and demand systems, achieve more efficient long term operations, deal with uncertainties in energy systems and reduce energy emissions. Highlighting novel models and their applications from leading experts in this important area, this book will appeal to

researchers students and engineers in the various domains of smart energy systems and encourage them to pursue research and development in this exciting and highly relevant field

Enhancing Performance, Efficiency, and Security Through Complex Systems Control Chana, Idriss,Bouazi, Aziz,Ben-azza, Hussain,2024-01-22 Academic scholars and professionals in engineering strive to enhance the performance efficiency and security of complex systems but accessing comprehensive resources for these challenges can be daunting Enhancing Performance Efficiency and Security Through Complex Systems Control offers an ideal solution Edited by esteemed academics Idriss Chana Aziz Bouazi and Hussain Ben Azza this book presents a curated collection of scientific articles encompassing multidisciplinary themes like computer science artificial intelligence electrical engineering and control systems By consolidating cutting edge research and methodologies this book empowers scholars and professionals to improve the design modeling and control of complex systems It provides practical solutions showcases new ideas and explores innovative technologies to enhance performance efficiency and safety With a meticulous selection process involving internationally recognized scientific committees this book ensures the highest quality standards making it a reliable reference for researchers PhD students and academics Delve into the wide range of topics covered from artificial intelligence to smart systems and unlock the potential of complex systems control to advance your research endeavors

Robotics, Computer Vision and Intelligent Systems Joaquim Filipe,Juha Röning,2024-05-07 This volume constitutes the proceedings of the 4th International Conference on Robotics Computer Vision and Intelligent Systems ROBOVIS 2024 which was held in Rome Italy during February 25 27 2024 The 8 full papers and 21 short papers are presented in this book were carefully reviewed and selected from 33 submissions They focus on topics on research and development in robotics computer vision and intelligent systems

Computational and Experimental Studies Y. Villacampa,G.M. Carlomagno,S. Ivorra,C. A. Brebbia,2018-03-28 Comprising specially selected papers on the subject of Computational Methods and Experimental Measurements this book includes research from scientists researchers and specialists who perform experiments develop computer codes and carry out measurements on prototypes Improvements relating to computational methods have generated an ever increasing expansion of computational simulations that permeate all fields of science and technology Validating the results of these improvements can be achieved by carrying out committed and accurate experiments which have undertaken continuous development Current experimental techniques have become more complex and sophisticated so that they require the intensive use of computers both for running experiments as well as acquiring and processing the resulting data This title explores new experimental and computational methods and covers various topics such as Computer aided Models Image Analysis Applications Noise Filtration of Shockwave Propagation Finite Element Simulations

Signal and Image Processing Techniques for Defense, Security, and Healthcare Omkar Lakshmi Jagan, B.,Mukherjee, Amrit,Mohammed, Thayyaba Khatoon,Reddy, Vustikayala Sivakumar,2025-03-19 Digital image processing or signal processing has been utilized for defense security and healthcare applications including the detection and

tracking of minuscule targets missile guidance vehicle navigation broad area surveillance and automatic or assisted target recognition In military and security applications image processing strategies attempt to minimize the burden of human analysts to accommodate the increasing volume of picture data acquired Other objectives include the creation of algorithms and methods that facilitate the development of autonomous systems capable of making judgments and taking actions based on all sensor inputs Further research into signal and image processing may help improve current techniques in these sectors

Signal and Image Processing Techniques for Defense Security and Healthcare explores the application of advanced signal and image processing technologies across these three critical sectors It examines how these techniques are used to analyze and interpret data in defense security and healthcare contexts This book covers topics such as healthcare technology computer algorithms and object detection and is a useful resource for computer engineers medical professionals security workers business owners academicians scientists and researchers

Next-Generation Applications and Implementations of Gamification Systems Portela, Filipe, Queirós, Ricardo, 2021-10-22 Gamification is being used everywhere despite its apparent plethora of benefits the unbalanced use of its main mechanics can end up in catastrophic results for a company or institution Currently there is a lack of knowledge of what it is leading to its unregulated and ad hoc use without any prior planning This unbalanced use prejudices the achievement of the initial goals and impairs the user's evolution bringing potential negative reflections Currently there are few specifications and modeling languages that allow the creation of a system of rules to serve as the basis for a gamification engine Consequently programmers implement gamification in a variety of ways undermining any attempt at reuse and negatively affecting interoperability

Next Generation Applications and Implementations of Gamification Systems synthesizes all the trends best practices methodologies languages and tools that are used to implement gamification It also discusses how to put gamification in action by linking academic and informatics researchers with professionals who use gamification in their daily work to disseminate and exchange the knowledge information and technology provided by the international communities in the area of gamification throughout the 21st century Covering topics such as applied and cloud gamification chatbots deep learning and certifications and frameworks this book is ideal for programmers computer scientists software engineers practitioners of technological companies managers academicians researchers and students
