Borrás Jr.,Lyda Fernanda Forero,Ruth Hall,Wendy Welford,Ben White,2021-06-29 The rise of authoritarian nationalist forms of populism and the implications for rural actors and settings is one of the most crucial foci for critical agrarian studies today with many consequences for political action *Authoritarian Populism and the Rural World* reflects on the rural origins and consequences of the emergence of authoritarian and populist leaders across the world as well as on the rise of multi-class mobilisation and resistance alongside wider counter-movements and alternative practices which together confront authoritarianism and nationalist populism The book includes 20 chapters written by contributors to the Emancipatory Rural Politics Initiative ERPI a global network of academics and activists committed to both reflective analysis and political engagement Debates about populism nationalism authoritarianism and more have exploded recently but relatively little of this has focused on the rural dimensions Yet wherever one looks the rural aspects are key not just in electoral calculus but in understanding underlying

drivers of authoritarianism and populism and potential counter movements to these Whether because of land grabs voracious extractivism infrastructural neglect or lack of services rural peoples disillusionment with the status quo has had deeply troubling consequences and occasionally hopeful ones as the chapters in this book show The chapters in this book were originally published in *The Journal of Peasant Studies* **NTA UGC NET Paper 1 Topic-wise 52 Solved Papers (2020 to 2004) 2nd Edition** Disha Experts,2021-02-04 **Security, Society and the State in the Caucasus** Kevork Oskanian,Derek Averre,2018-12-07 The Caucasus including the South Caucasus states and Russia s North Caucasus continues to be an area of instability and conflict This book based on extensive original research explores in detail at both the local and regional level the interaction between state and society and the impact of external actors engagement in the region within a conceptual framework linking security and democracy Unlike other books on the subject which tend to examine the issues from a Western political science perspective this book incorporates insights from sociology geography and anthropology as well as politics and contains contributions from scholars who have carried out extensive research in the region within a European Commission funded Seventh Framework Programme project **Chemical Control** Michael Crowley,2016-01-26 This thoroughly researched study highlights the international community s failure to regulate contemporary state research development marketing and or deployment of riot control agents and incapacitating chemical agent weapons **Saudi Arabia in a Multipolar World** Zakir Hussain,2016-04-14 The Kingdom of Saudi Arabia has established itself as the twelfth largest economy in the world the largest West Asian economic power world s largest oil producer and a strong and capable force in international politics particularly in the Sunni Islamic world However at present it is at crossroads Should it continue as a kingdom or usher in the process of inclusive political representation This volume answers such questions and explores how the state is coping with domestic regional and global developments to remain relevant in the changing times It provides a holistic overview of a slew of economic political cultural military and security policy measures that have been initiated by the government The work also offers a detailed analysis of Saudi Arabia s relations with three significant powers USA China and India and how they are evolving under new geopolitical and geostrategic dynamics This book will interest strategists policymakers researchers and students of international relations geopolitics political science and political economy as well as the informed reader *The Defence Industrial Triptych* Henrik Heidenkamp,John Louth,Trevor Taylor,2015-02-20 The relationship between government and the businesses that contribute towards the defence and security of the state is a critical one it often underscores a modern state s foreign policy and sense of place in the world Yet despite its clear importance this subject is underexplored and rarely analysed in a rigorous manner As a consequence government defence industrial policies if they exist at all often seem somewhat contrived ill considered and contradictory The Defence Industrial Triptych systematically analyses the components and drivers of the relationships that bind a government to its defence industrial base by examining three major case studies the UK US and Germany who

between them account for over three quarters of NATO defence spending The features of their defence industrial relationships whether common or unique provide vital lessons for policy makers industrialists and the taxpayer As defence cuts bite across NATO and as the UK approaches the 2015 Strategic Defence and Security Review the relationships this Whitehall Paper considers are more important than ever **Rigor in the K-5 ELA and Social Studies Classroom**

Hilger, 2022-04-26 How parents have been set up to fail and why helping them succeed is the key to achieving a fair and prosperous society Few people realize that raising children is the single largest industry in the United States Yet this vital work receives little political support and its primary workers parents labor in isolation If they ask for help they are made to feel inadequate there is no centralized organization to represent their interests and there is virtually nothing spent on research and development to help them achieve their goals It s almost as if parents are set up to fail and the result is lost opportunities that limit children s success and make us all worse off In *The Parent Trap* Nate Hilger combines cutting edge social science research revealing historical case studies and on the ground investigation to recast parenting as the hidden crucible of inequality Parents are expected not only to care for their children but to help them develop the skills they will need to thrive in today s socioeconomic reality but most parents including even the most caring parents on the planet are not trained in skill development and lack the resources to get help How do we fix this The solution Hilger argues is to ask less of parents not more America should consider child development a public investment with a monumental payoff We need a program like

Medicare call it Familycare to drive this investment To make it happen parents need to organize to wield their political power on behalf of children who will always be the largest bloc of disenfranchised people in this country The Parent Trap exposes the true costs of our society's unrealistic expectations around parenting and lays out a profoundly hopeful blueprint for reform
