**Addressing Methodological Challenges in Interpreting Studies Research** Claudio Bendazzoli, Claudia Monacelli, 2016-06-22 Using interaction as a fundamental springboard Addressing Methodological Challenges in Interpreting Studies Research showcases the major breakthrough in interpreting studies made by investigating community interpreting and the inherent high degree of participant interaction The book adds a reflexive twist and espouses the notion of the analyst as not separate from the context under study After looking at dialogue interpreters cast away from the carpeted walls of sound proof booths and deprived of the spotlighted lectern podium position at high level fora it has become clear that the interpreter s invisibility not to mention their neutrality is uppermost in the minds of both users and providers in terms of expectations Among all the participants in any mediated communicative situation it is the interpreter who is exceedingly visible and potentially most influential in shaping and coordinating the ongoing exchanges The book proposes that a similar view be applied to researchers engaged in interpreting research especially in empirical investigations Different forms of interaction between researchers and the data in their studies are inevitable This applies to every stage of their work ranging from all the pre analysis activities to the analysis itself and the post analysis stage in which results are disseminated in the research community and possibly the target population This volume will stand to benefit all those who work with researching language issues not only because of the various approaches covered in the volume but also because of the ways in which they are reframed as a result of shifting contextual constraints
