

Human Body Cellular Communication

Base your answer to the next 3 questions on the diagram of nerve cells below and on your knowledge of biology.

1. In the space below, sketch a chemical molecule that might be released from nerve cell A and be recognized and bind to area 1 of nerve cell B.

2. Describe what would happen if a drug molecule shaped like ■ were introduced into this nerve pathway.

—Nothing; the shape would not be accepted by receptors on B.

3. Identify one substance, other than the secretions from nerve cells, used in cell communication.

— hormones — antigens — receptor molecules

Base your answer to the next 2 questions on the information below and on your knowledge of biology.

Cell communication involves a cell detecting and responding to signals from other cells. Receptor molecules play an important role in these reactions. Human cells have insulin receptors that are needed for the movement of glucose out of the blood.

4. State one way that the shape of the insulin receptor is related to its role in cell communication.

— The shape of the receptor molecule is specific for a specific molecule.

5. A typical human liver cell can have over 90,000 insulin receptors. If a genetic error occurred, resulting in each liver cell in a person having only 1,000 insulin receptors, what specific effect would this have on the liver cells?

— The liver would receive less insulin.

Randall Curren, Ellen Metzger,2018-02-02 A philosopher and a scientist propose that sustainability can be understood as living well together without diminishing opportunity to live well in the future Most people acknowledge the profound

importance of sustainability but few can define it We are ethically bound to live sustainably for the sake of future generations but what does that mean In this book Randall Curren a philosopher and Ellen Metzger a scientist clarify normative aspects of sustainability Combining their perspectives they propose that sustainability can be understood as the art of living well together without diminishing opportunity to live well in the future Curren and Metzger lay out the nature and value of sustainability survey the problems catalog the obstacles and identify the kind of efforts needed to overcome them They formulate an ethic of sustainability with lessons for government organizations and individuals and illustrate key ideas with three case studies Curren and Metzger put intergenerational justice at the heart of sustainability discuss the need for fair as opposed to coercive terms of cooperation to create norms institutions and practices conducive to sustainability formulate a framework for a fundamental ethic of sustainability derived from core components of common morality and emphasize the importance of sustainability education The three illustrative case studies focus on the management of energy water and food systems examining the 2010 Gulf of Mexico oil spill Australia's National Water Management System and patterns of food production in the Mekong region of Southeast Asia

Living machines Tony J. Prescott, Nathan Lepora, Paul F. M. J. Verschure, 2018-04-13 Contemporary research in science and engineering is seeking to harness the versatility and sustainability of living organisms By exploiting natural principles researchers hope to create new kinds of technology that are self repairing adaptable and robust and to invent a new class of machines that are perceptive social emotional perhaps even conscious This is the realm of the living machine Living machines can be divided into two types biomimetic systems that harness the principles discovered in nature and embody them in new artifacts and biohybrid systems in which biological entities are coupled with synthetic ones Living Machines A handbook of research in biomimetic and biohybrid systems surveys this flourishing area of research capturing the current state of play and pointing to the opportunities ahead Promising areas in biomimetics include self organization biologically inspired active materials self assembly and self repair learning memory control architectures and self regulation locomotion in air on land or in water perception cognition control and communication Drawing on these advances the potential of biomimetics is revealed in devices that can harvest energy grow or reproduce and in animal like robots that range from synthetic slime molds to artificial fish to humanoids Biohybrid systems is a relatively new field with exciting and largely unknown potential but one that is likely to shape the future of humanity This book surveys progress towards new kinds of biohybrid such as robots that merge electronic neurons with biological tissue micro scale machines made from living cells prosthetic limbs with a sense of touch and brain machine interfaces that allow robotic devices to be controlled by human thought The handbook concludes by exploring some of the impacts that living machine technologies could have on both society and the individual exploring questions about how we will see and understand ourselves in a world in which the line between the natural and the artificial is increasingly blurred With contributions from leading researchers from science engineering and the humanities this handbook will be of broad interest

A Field Philosopher's Guide to Fracking: How One Texas Town Stood Up to Big Oil and Gas Adam Briggie, 2015-10-19 Winner of the Writers League of Texas Book Awards Finalist for the J Anthony Lukas Book Prize From the front lines of the fracking debate a field philosopher explores one of our most divisive technologies When philosophy professor Adam Briggie moved to Denton Texas he had never heard of fracking Only five years later he would successfully lead a citizens initiative to ban hydraulic fracturing in Denton the first Texas town to challenge the oil and gas industry On his journey to learn about fracking and its effects he leaped from the ivory tower into the fray In beautifully narrated chapters Briggie brings us to town hall debates and neighborhood meetings where citizens wrestle with issues few fully understand Is fracking safe How does it affect the local economy Why are bakeries prohibited in neighborhoods while gas wells are permitted next to playgrounds In his quest for answers Briggie meets people like Cathy McMullen Her neighbors cows asphyxiated after drinking fracking fluids and her orchard was razed to make way for a pipeline Cathy did not consent

to drilling but those who profited lived far out of harm's way Briggles first instinct was to think about fracking deeply Drawing on philosophers from Socrates to Kant but also on conversations with engineers legislators and industry representatives he develops a simple theory to evaluate fracking we should give those at risk to harm a stake in the decisions we make and we should monitor for and correct any problems that arise Finding this regulatory process short circuited with government and industry alike turning a blind eye to symptoms like earthquakes and nosebleeds Briggles decides to take action Though our field philosopher is initially out of his element joining fierce activists like Texas Sharon once called the worst enemy of the oil and gas industry his story culminates in an underdog victory for Denton now nationally recognized as a beacon for citizens rights at the epicenter of the fracking revolution [Can Democracy Handle Climate Change?](#) Daniel J. Hird,2021-02-15 From shipments of Canadian waste rotting in developing countries to overflowing landfills and ineffective recycling programs Canada is facing a waste crisis Canadians are becoming increasingly aware that waste is an acute environmental and human health issue and a complex one the solutions to which are often contradictory Canada's Waste Flows is an honest look at the production and movement of Canadian waste from

region to region and across the globe and its consequences Through a series of timely empirical case studies the book reveals waste as less of a technological problem and more of a material economic political historical and cultural concern Canada's Waste Flows demonstrates that Canadians are misdirecting their attention to post consumer waste and their responsibility for minimizing it through recycling waste must be understood as a social justice issue and in particular as a symptom of ongoing settler colonialism Through a comparative study of waste management in southern and northern Canadian communities Myra Hird argues that we will only resolve our waste crisis through democratic engagement A critical and compelling book that will generate conversation and incite change Canada's Waste Flows uncovers how Canada's role as a global leader in waste production and export is key to changing Canada's waste future
