This results in giving predictions that may not be accurate Before we proceed further I will share an incident I was walking along with a very aged astrologer

He was almost blind but every morning he used to ask about the time of sunrise sunset Yogas even Karan etc After that he used to make predictions based on queries only He generally never made birth charts until he was required to do so It was raining heavily and someone asked when the rain would stop Pandit ji He asked me what the Moon Nakshatra is and when it will change He predicted the time when the rain would stop and rain and it stopped raining that time Simple way of making predictions which we astrologers do not apply So I recommend that students of astrology should give due importance to Panchang In our ancient references I could not find the mention of Divisional charts like D 3 D 7 and D 10 up to D 120 except the D 9 chart which is read as the Navamsha chart The reason may be the non availability of time measuring devices to such levels And now of late research the number of divisional charts has gone much further There is still much more information to be decoded in Basics of Astrology in elements of Rashis houses and planets With the support of 27 Nakshatras and padas plus the support of 5 limbs of Panchang we get sufficient information for predictive astrology and I consider divisional charts as a comparative tool for confirmative support if needed But our modern day astrology students are more emphatic in creating volumes of research which is making this science complex and complicated for new aspirants Otherwise the passing down of this science was in a hierarchal manner which travelled from one generation to another for centuries but of late that evolution has become a thing of the past However I would still emphatically admit that what our older wisdom was guiding us was simple and fabulous The term Panchang is derived from two Sanskrit words Pancha meaning five and Anga meaning limbs Together they signify the five essential elements that form the backbone of astrological calculations and predictions The five limbs of the Panchang Tithi lunar day Vara weekday Nakshatra constellation Yoga planetary combination and Karana half day are more than just concepts These five elements of time hold the base for any astrological predictions This book seeks to explore and demystify the Panchang a vital tool that has been guiding millions across cultures and generations
