relevant period to the present and analyses the topical issues in significant detail The book also offers some empirical analyses to show the impact of external changes on the concentration of firms in this industry and the regional inequalities that have emerged from regional variations in firms employment labour income and profit levels Further it addresses another striking feature namely the role of preferential trading blocs or Regional Trading Arrangements RTA in creating trade diverting effects related to this sector apart from the implications of foreign collaborations and cross border mergers and acquisitions Many economists fear that the benefits of these RTAs for the partner countries are much greater than those for India with net gains of incremental exports from India being small or even negative This book discusses these critical issues in the context of India s textile and apparel trade
