The Whitehall Evening Post Or London Intelligencer, 1755 **Who Should Pay?** Natasha Quadlin, Brian

Powell, 2022-01-14 Americans now obtain college degrees at a higher rate than at any time in recent decades in the hopes of improving their career prospects At the same time the rising costs of an undergraduate education have increased dramatically forcing students and families to take out often unmanageable levels of student debt The cumulative amount of student debt reached nearly 1.5 trillion in 2017 and calls for student loan forgiveness have gained momentum Yet public policy to address college affordability has been mixed While some policymakers support more public funding to broaden educational access others oppose this expansion Noting that public opinion often shapes public policy sociologists Natasha Quadlin and Brian Powell examine public opinion on who should shoulder the increasing costs of higher education and why *Who Should Pay* draws on a decade's worth of public opinion surveys analyzing public attitudes about whether parents, students or the government should be primarily responsible for funding higher education Quadlin and Powell find that between 2010 and 2019 public opinion has shifted dramatically in favor of more government funding In 2010 Americans overwhelmingly believed that parents and students were responsible for the costs of higher education Less than a decade later the percentage of Americans who believed that federal or state local government should be the primary financial contributor has more than doubled The authors contend that the rapidity of this change may be due to the effects of the 2008 financial crisis and the growing awareness of the social and economic costs of high levels of student debt Quadlin and Powell also find increased public endorsement of shared responsibility between individuals and the government in paying for higher education The authors additionally examine attitudes on the accessibility of college for all whether higher education at public universities should be free and whether college is worth the costs Quadlin and Powell also explore why Americans hold these beliefs They identify individualistic and collectivist world views that shape public perspectives on the questions of funding accessibility and worthiness of college Those with more individualistic orientations believed parents and students should pay for college and that if students want to attend college then they should work hard and find ways to achieve their goals Those with collectivist orientations believed in a model of shared responsibility one in which the government takes a greater level of responsibility for funding education while acknowledging the social and economic barriers to obtaining a college degree for many students The authors find that these belief systems differ among socio demographic groups and that bias sometimes unconscious and sometimes deliberate regarding race and class affects responses from both individualistic and collectivist oriented participants Public opinion is typically very slow to change Yet *Who Should Pay* provides an illuminating account of just how quickly public opinion has shifted regarding the responsibility of paying for a college education and its implications for future generations of students **Intro to Failure** William Pacwa, 2020-08-12 The American higher education system is

broken Colleges and universities are shifting far from their roots as centers for academic scholarship into pools of adult infants who barely mature and are provoked by the slightest non conforming opinions Their inefficiency is setting students up to fail wasting students time and providing little in return These institutions are now the hub for propagating modern indentured servitude by bestowing the youth thousands of dollars in unscrupulous student loan debt Instead of an atmosphere of intellectual curiosity the campus culture is saturated with promiscuity binge drinking and partying Increasingly common college students experience depression anxiety and physical abasement as a result of this environment A majority of incoming freshmen are now going to college to prolong adolescence rather than to progress upright into adulthood American higher education is a crumbling spectacle where the level of education the value of the degree and the overall prestige are quickly deteriorating Arguably the university system is now doing more harm than good Those who enter the supposed golden gates of higher education are not getting the positive return on investment of past generations Why has the higher education system changed so little in such a time of major transformation in the access to information through the internet How can it cost so much more and take just as long to complete a standard bachelor s degree What are the main failures plaguing colleges and universities And what is the future for coming generations for those aspiring to gain an education This book sets out to find answers to the aforementioned questions William Pacwa graduated from a four year university in only two years at the age of 19 during the spring of 2020 Throughout this time in university he witnessed structural flaws in the American higher education system The goal of his book is to clearly articulate those problems and give concise solutions to rectify the inadequacies for the betterment of future generations And for those who still want or are required to attend university he uncovers the factors that allow students to complete their degree with speed and efficiency saving incoming students time and money **Higher Education** Jaclyn M. Morelli,2010 Unequal Higher Education

Barrett J. Taylor,Brendan Cantwell,2019-05-03 American higher education is often understood as a vehicle for social advancement However the institutions at which students enroll differ widely from one another Some enjoy tremendous endowment savings and or collect resources via research which then offsets the funds that students contribute Other institutions rely heavily on student tuition payments These schools may struggle to remain solvent and their students often bear the lion s share of educational costs Unequal Higher Education identifies and explains the sources of stratification that differentiate colleges and universities in the United States Barrett J Taylor and Brendan Cantwell use quantitative analysis to map the contours of this system They then explain the mechanisms that sustain it and illustrate the ways in which rising institutional inequality has limited individual opportunity especially for students of color and low income individuals

Educating the Top 100 Percent Stephen G. Katsinas,Nathaniel J. Bray,Martha J. Kanter,2022-08-23 Educating the Top 100 Percent assesses the decline of higher education funding and offers ambitious policy recommendations to restore the possibility of accessible affordable education for all Stephen G Katsinas Nathaniel J Bray and Martha J Kanter probe the

complex interplay of federal state and local policies and illustrate how government actions have over time contributed to the long term slide of US educational attainment Declining federal and state funding of public higher education has forced institutions to revise their financial models passing costs directly through to students to the detriment of prospective students and the nation Experts in education policy the authors point out how the unintended consequences of today s funding model deny an ever increasing portion of the population important educational and professional opportunities By providing context for how we arrived at this financial conundrum and analyzing robust quantitative data from national sources Katsinas and his colleagues offer pragmatic sustainable and stable policy options for educating all Americans The authors provide innovative ideas key lessons learned and actionable proposals to fund public higher education Their top down federal and bottom up local and state policy solutions aim to rectify plummeting high school to college continuation and college graduation rates As a result they present a vision of a brighter economic cultural and civic future for educating all Americans Educating the Top 100 Percent demonstrates how stable sustainable funding policies can scaffold a better public higher education system for all *The Law of Higher Education, 5th Edition* William A. Harrison, Monica Hatfield Price, 2017-02-24 Interrupting Class Inequality in Higher Education explores why socioeconomic inequality persists in higher education despite widespread knowledge of the problem Through a critical analysis of the current leadership practices and policy narratives that perpetuate socioeconomic inequality this book outlines the trends that negatively impact low and middle income students and offers effective tools for creating a more equitable future for higher education By taking a solution focused approach this book will help higher education students leaders and policy makers move from despair and inertia to hope and action

Buying the Best Charles T. Clotfelter, 2014-07-14 Since the early 1980s the rapidly increasing cost of college together with what many see as inadequate attention to teaching has elicited a barrage of protest Buying the Best looks at the realities behind these criticisms at the economic factors that are in fact driving the institutions that have been described as machines without brakes In designing his study Charles Clotfelter examines the escalation in spending in the arts and sciences at four elite institutions Harvard Duke Chicago and Carleton He argues that the rise in costs has less to do with increasing faculty salaries or lowered productivity than with a broad based effort to improve quality provide new services to students pay for large investments in new facilities and equipment including computers and ensure access for low income students through increasingly expensive financial aid In Clotfelter's view spiraling costs arise from the institutions lofty ambitions and are made possible by steadily intensifying demand for places in the country's elite colleges and universities Only if this demand slackens will universities be pressured to make cuts or pursue efficiencies Buying the Best is the first study to make use of the internal historical records of specific institutions as opposed to the frequently unreliable aggregate records made available by the federal government for the use of survey researchers As such it has the virtue of allowing Clotfelter to draw much more realistic comparative conclusions than have hitherto been reported While acknowledging the obvious drawbacks of a small sample Clotfelter notes that the institutions studied are significant for the disproportionate influence they and comparable elite institutions exercise upon research and upon the training of future leaders The book contains a foreword by William G Bowen President of the Mellon Foundation and Harold T Shapiro President of Princeton

University Concern about ever rising costs runs like a thread through the myriad critiques of higher education that have been published in recent years One of the great contributions of Clotfelter's work is to dismiss easy explanations for the problems that worry us With some of the scales removed from their eyes both those with responsibility for the future of higher education and observers who continue to expect an ever wider scope of effort from particular colleges and universities can now adjust their focus Armed with this original and extremely useful analysis we can confront more directly and with less romanticism the real choices before us as we seek to employ limited resources most effectively in the service of teaching and research William G Bowen President Mellon Foundation Harold T Shapiro President Princeton University from the foreword Originally published in 1996 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 Quality and Equality: New Levels of Federal

The Economics of Higher Education in the United States Thomas Adam, Ayten Burcu Bayram, 2019-03-27 In The Economics of Higher Education in the United States editors Thomas Adam and Ayten Burcu Bayram have assembled five essays adapted from the fifty second annual Walter Prescott Webb Memorial Lecture Series that focus on the increasing cost of college a topic that causes great anxiety among students parents faculty administrators legislators and taxpayers Essays focus on the funding of colleges the funding of professional schools and the provision of scholarships and student loans for undergraduate students to reveal the impact of money on the structure of institutions of higher education and the organization of colleges The cost of higher education has risen dramatically as both states and the federal government have significantly lowered their contributions to offset that cost With rising tuition and cost of living on top of a growing student population too many graduates find themselves in financial trouble after earning their undergraduate degree Mounting student debt prevents an increasing number of young professionals from embarking on the very life for which their education was supposed to prepare them How have we come from a political environment in which higher education was perceived as a public good normally free to the user to an environment in which higher education is seen as a privilege subject primarily to market forces The Economics of Higher Education in the United States offers a desperately needed analysis in an attempt to understand and tackle this looming problem **Reinventing Higher Education** Ben Wildavsky, Andrew P. Kelly, Kevin Carey, 2011-04-01 The inspiration for this timely book is the pressing need for fresh ideas and innovations in U S higher education At the heart of the volume is the realization that higher education must evolve in fundamental ways if it is to

respond to changing professional economic and technological circumstances and if it is to successfully reach and prepare a vast population of students traditional and nontraditional alike for success in the coming decades This collection of provocative articles by leading scholars writers innovators and university administrators examines the current higher education environment and its chronic resistance to change the rise of for profit universities the potential future role of community colleges in a significantly revised higher education realm and the emergence of online learning as a means to reshape teaching and learning and to reach new consumers of higher education Combining trenchant critiques of current conditions with thought provoking analyses of possible reforms and new directions Reinventing Higher Education is an ambitious exploration of possible future directions for revitalized American colleges and universities
