These molecules are connected with **chemical bonds** that come from atoms exchanging of valence electrons. When various atoms bond with one another, they can form different types of chemical bonds with unique properties.

- 2) The winner is the student with the most beads at the end of each round.
- 3) Have students record scores for each round in the table on page 2.
- 4) After all rounds have been completed, switch up who is holding the bowl and who is playing, repeat until all members of a group have played each other.

Rounds -
