## **Grade10 Geography 2013 November Memo:**

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

Ethics in Everyday Places Tom Koch, 2022-11-01 An exploration of moral stress distress and injuries inherent in modern society through the maps that pervade academic and public communications worlds In *Ethics in Everyday Places* ethicist and geographer Tom Koch considers what happens when as he puts it you do everything right but know you've done something wrong The resulting moral stress and injury he argues are pervasive in modern Western society Koch makes his argument from the ground up

from the perspective of average persons and through a revealing series of maps in which issues of ethics and morality are embedded The book begins with a general grounding in both moral stress and mapping as a means of investigation The author then examines the ethical dilemmas of mapmakers and others in the popular media and the sciences including graphic artists journalists researchers and social scientists Koch expands from the particular to the general from mapmaker and journalist to the readers of maps and news He explores the moral stress and injury in educational funding poverty and income inequality Why aren't we angry that one in eight fellow citizens lives in federally certified poverty transportation modeling seen in the iconic map of the London transit system and the hidden realities of exclusion and U S graft organ transplantation This uniquely interdisciplinary work rewrites our understanding of the nature of moral stress distress and injury and ethics in modern life Written accessibly and engagingly it transforms how we think of ethics personal and professional amid the often conflicting moral injunctions across modern society Copublished with Esri Press **The**

**Coming of Neo-Feudalism** Joel Kotkin, 2020-05-12 Following a remarkable epoch of greater dispersion of wealth and opportunity we are inexorably returning towards a more feudal era marked by greater concentration of wealth and property reduced upward mobility demographic stagnation and increased dogmatism If the last seventy years saw a massive expansion of the middle class not only in America but in much of the developed world today that class is declining and a new more hierarchical society is emerging The new class structure resembles that of Medieval times At the apex of the new order are two classes a reborn clerical elite the clerisy which dominates the upper part of the professional ranks universities media and culture and a new aristocracy led by tech oligarchs with unprecedented wealth and growing control of information These two classes correspond to the old French First and Second Estates Below these two classes lies what was once called the Third Estate This includes the yeomanry which is made up largely of small businesspeople minor property owners skilled workers and private sector oriented professionals Ascendant for much of modern history this class is in decline while those below them the new Serfs grow in numbers a vast expanding property less population The trends are mounting but we can still reverse them if people understand what is actually occurring and have the capability to oppose them America's

Moment: Creating Opportunity in the Connected Age Rework America, 2015-06-15 It is time for a new conversation Amid the biggest economic transformation in a century the challenge of our time is to make sure that all Americans benefit from the wave of digital revolutions around the world that have permeated and upended modern life Yet today's economic arguments seem stuck We need a new vision of a hopeful future and a new action agenda So many Americans are uncertain about the future How can there be so many paths to opportunity with so few people traveling them As a nation we have to understand what is required to help Americans succeed now and how to prepare our country for what comes next We have been here before A hundred years ago America experienced the greatest economic transformation and technological revolution in its history The transformation of the past twenty years as the world has moved through the information era into the digital age

has turned our life and work upside down once again It is a time of tremendous change but also of tremendous possibility Rework America is a group of American leaders who know from experience the challenges we face and the potential solutions In America s Moment they suggest a practical agenda for an exciting future It is illustrated by people who are already showing the way and includes actions Americans can take today in their own communities preparing people to succeed using the reach of the Internet and data to innovate jobs and to reach new markets all over the world using technology to match employers and workers and transitioning to a no collar working world neither blue collar nor white collar Set against the history of how Americans succeeded once before in remaking their country America s Moment is about the future It describes how the same forces of change technology and a networked world can become tools that can open opportunity to everyone
