Amrein-Beardsley,2014-04-24 Since passage of the of No Child Left Behind Act in 2001 academic researchers econometricians and statisticians have been exploring various analytical methods of documenting students academic progress over time Known as value added models VAMs these methods are meant to measure the value a teacher or school adds to student learning from one year to the next To date however there is very little evidence to support the trustworthiness of these models What is becoming increasingly evident yet often ignored mainly by policymakers is that VAMs are 1 unreliable 2 invalid 3 nontransparent 4 unfair 5 fraught with measurement errors and 6 being inappropriately used to make consequential decisions regarding such things as teacher pay retention and termination Unfortunately their unintended consequences are not fully recognized at this point either Given such the timeliness of this well researched and thoughtful book cannot be overstated This book sheds important light on the debate surrounding VAMs and thereby offers

states and practitioners a highly important resource from which they can move forward in more research based ways

**From Reversal of Fortune to Economic Resurgence** Banji Oyelaran-Oyeyinka, Oyebanke Abejirin, 2024-11-05 This book examines Nigeria Africa's largest economy and most populous country and Asia in comparative development and sectoral perspectives We traced the divergent growth in wealth between the two regions It takes a novel approach of matching key growth sectors across five selected Asian countries and Nigeria in a cross regional context We found that state and institutional capabilities underlying the generation and diffusion of industrial and technological knowledge in Asia distinguished it from Africa We employ quantitative and qualitative methods including case studies and statistical econometric methods to analyze factors that separate the sample countries that made rapid economic progress in catching up and those that tend to be stagnating and falling behind Progress made by Asian countries over the last five decades was due in large part to their pursuit of industrialization technological acquisition underpinned by leadership good governance and policies in the right institutional contexts The four Asian countries compared with Nigeria are Indonesia Malaysia South Korea Vietnam and Bangladesh There was not one grand development formula however the strategy broadly consisted of industrial vertical diversification as well as horizontal diversification in agriculture Building industrial capabilities that enable export competitiveness was critical Again while leadership is not usually included in factors of growth the book devotes a chapter to Leadership and Industrialization and another to State Capacity Industrialization and Economic Growth African countries on the contrary took the low road in exporting minerals and raw agricultural commodities with little value addition in the process Africa experienced a reversal of fortune The African condition is manifestly a Reversal of Fortune because in the 1950s they were ahead of or equal to Asia in per capita income as well as in other development metrics We carried out empirical measurement of Reversal of Fortune manifested in economic social technological and industrial conditions by analyzing the disparities in development metrics particularly the levels and rates of growth of national incomes industrialization rates and Human Development Index HDI The differences are stark

**Core-periphery Relations in the European Union** José Magone, Brigid Laffan, Christian Schweiger, 2016-02-26 Successive Enlargements to the European Union membership have transformed it into an economically politically and culturally heterogeneous body with distinct vulnerabilities in its multi level governance This book analyses core periphery relations to highlight the growing cleavage and potential conflict between the core and peripheral member states of the Union in the face of the devastating consequences of Eurozone crisis Taking a comparative and theoretical approach and using a variety of case studies it examines how the crisis has both exacerbated tensions in centre periphery relations within and outside the Eurozone and how the European Union's economic and political status is declining globally This text will be of key interest to students and scholars of European Union studies European integration political economy public policy and comparative politics

**Breaking Ranks** Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for

higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

*The Dog Bone Portfolio* Margret Kopala, John Budden, 2015-06-01 Like so many of us Margret Kopala lost a significant portion of her life savings in the stock market crash of 2008 Unlike us however she went on a long and intense financial odyssey to find out what caused the losses and what she could do to protect herself in the future Armed with her skills as a journalist and public policy analyst fueled by equal measures of fear and determination and mentored by successful investment strategist and financial broadcaster John Budden Kopala researched and wrote this magisterial analysis of how Russian economist Nikolai Kondratieff s long wave theory is playing out in what many today describe as a financial Winter Along the way she is introduced to financial experts familiar with Kondratieff scholarship John Budden s interviews in the book with Dean LeBaron J Anthony Boeckh Ian Gordon Larry Jeddelloh Don Lindsey the late Lord William Rees Mogg Jim Rogers Eric Sprott and Ronald Peter St ferle show how investors must put a new spin on asset allocation and security of their assets like a dog that buries bones in different places we would be advised to allocate our assets to different parts of the world and to ensure that a good portion of those assets include gold the only continuous basis of wealth across history and around the world Kopala explores the global national and personal effects of overconsumption underproduction energy and innovation the printing of money to save the economy competitive devaluations deflation reflation and inflation and war the ultimate economic crisis She documents those technologies that seeded previous New Economy Spring seasons from the era of canals to those of railroads automobiles and infotech and probes today s innovations most likely to seed the Next New Economy that we

J.

Bishop, Elizabeth Boling, Jan Elen, Vanessa Svihla, 2020-09-21 The 5th edition of the prestigious AECT Handbook continues previous efforts to reach outside the traditional instructional design and technology community to the learning sciences and computer information systems communities toward developing a conceptualization of the field However given the pervasive and increasingly complex role technology now plays in education since the 1st edition of the Handbook in 1996 the editors have reorganized the research chapters in this edition to focus on the learning problems we are trying to solve with educational technologies rather than to focus on the things we are using to solve those problems Additionally for the first time this edition of the Handbook reflects our field's growing understanding of the importance of design scholarship to

inform practice by including design case chapters These changes for this edition of the Handbook are intended to bring educational technology research into the broader framework of educational research by elaborating on the role instructional design and technology plays as a scholarly discipline in addressing education s increasingly complex issues Provides comprehensive reviews of new developments in educational technology research and design practice Includes concrete examples to guide future research and practice in the ways emerging technologies can be used to solve educational problems Contains extensive references furnished to guide readers to the most recent research and design practice in the field of instructional design and technology
