Parents Matter Regina M. Mistretta, 2016-09-08 Parents are social factors in children s lives that can positively influence math achievement and one does not need a degree in math to provide support What one needs is a guidebook filled with good questions to pose tips for supporting math thinking and general attitudes about math and an insider s view into what math teaching and learning looks like in today s classrooms This book serves as that guidebook and its author invites parents to use it while making sense of math with children Parents and children are encouraged to share and celebrate multiple ways of solving math examples rather than debate over the better approach Chapter 1 includes a description about how and why math teaching has changed through the years The big math ideas taught through the grades are outlined in Chapter 2 Chapters 3 through 5 offer detailed descriptions about how big math ideas develop in Grades Kindergarten through 2 3 through 5 and 6 through 8 respectively In conclusion Chapter 6 offers tasks that provide additional entry points for engaging in conversation about math at home

Math for All Linda Schulman Dacey, Karen Gartland, 2009 Embrace the diverse spectrum of abilities interests and learning styles among students with this powerful series Each book offers practical research based guidance to differentiating instruction in the mathematics classroom The authors provide dozens of ready to use differentiated tasks including reproducibles along with ways to scaffold mathematical learning strategies for providing and structuring choice within classrooms guidance in leading large group discussions when students are completing different activities and engaging ways to address NCTM s Principles and Standards for School Mathematics and Curriculum Focal Points

Mindset Mathematics: Visualizing and Investigating Big Ideas, Grade 6 Jo Boaler, Jen Munson, Cathy Williams, 2019-01-09 Engage students in mathematics using

growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts In this volume you ll find a collection of low floor high ceiling tasks that will help you do just that by looking at the big ideas at the sixth grade level through visualization play and investigation During their work with tens of thousands of teachers authors Jo Boaler Jen Munson and Cathy Williams heard the same message that they want to incorporate more brain science into their math instruction but they need guidance in the techniques that work best to get across the concepts they needed to teach So the authors designed Mindset Mathematics around the principle of active student engagement with tasks that reflect the latest brain science on learning Open creative and visual math tasks have been shown to improve student test scores and more importantly change their relationship with mathematics and start believing in their own potential The tasks in Mindset Mathematics reflect the lessons from brain science that There is no such thing as a math person anyone can learn mathematics to high levels Mistakes struggle and challenge are the most important times for brain growth Speed is unimportant in mathematics Mathematics is a visual and beautiful subject and our brains want to think visually about mathematics With engaging questions open ended tasks and four color visuals that will help kids get excited about mathematics Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards CCSS and can be used with any current curriculum
