Grade Sepedi Paper One For 2013

Carolyn McKinney

Grade Sepedi Paper One For 2013:

Effectiveness of teachers' guides in the Global South Benjamin Piper, Yasmin Sitabkhan, Jessica Mejia, Kellie Betts, 2018-05-10 This report presents the results of RTI International Education's study on teachers' guides across 13 countries and 19 projects. Using quantitative and qualitative methods, we examine how teachers' guides across the projects differ and find substantial variation in the design and structure of the documents. We develop a scripting index so that the scripting levels of the guides can be compared across projects. The impact results of the programs that use teachers' guides show significant impacts on learning outcomes associated with approximately an additional half year of learning, showing that structured teachers' guides contribute to improved learning outcomes. During observations, we find that teachers make a variety of changes in their classroom instruction from how the guides are written, showing that the utilization of structured teachers' guides does not create robotic teachers unable to use their own professional skills to teach children. Unfortunately, many changes that teachers make reduce the amount of group work and interactivity that was described in the guides, suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide. The report includes a set of research-based guidelines that material developers can use to develop teachers' guides that will support effective instructional practices and help improve learning outcomes. The key takeaway from the report is that structured teachers' guides improve learning outcomes, but that overly scripted teachers' guides are somewhat less effective than simplified teachers' guides that give specific guidance to the teacher but are not written word for word for each lesson in the guide.

Language and Power in Post-Colonial Schooling Carolyn McKinney, 2016-07-15 Critiquing the positioning of children from non-dominant groups as linguistically deficient, this book aims to bridge the gap between theorizing of language in critical sociolinguistics and approaches to language in education. Carolyn McKinney uses the lens of linguistic ideologies, teachers' and students' beliefs about language, to shed light on the continuing problem of reproduction of linguistic inequality. Framed within global debates in sociolinguistics and applied linguistics, she examines the case of historically white schools in South Africa, a post-colonial context where political power has shifted but where the power of whiteness continues to provide new insights into the complex relationships between language and power and language and subjectivity. Implications for language curricula and policy in contexts of linguistic diversity are foregrounded. Providing an accessible overview of the scholarly literature on language ideologies and language as social practice and resource in multilingual contexts.

Language and Power in Post Colonial Schooling uses the conceptual tools it presents to analyze classroom interaction and ethnographic observations from the day-to-day life in case study schools and explores implications of both the research literature and the analyses of students and teachers' discourses and practices for language in education policy and curriculum.

Glimpses into Primary School Teacher Education in South Africa Sarah Gravett, Elizabeth Henning, 2020-11-05 This book explores the current landscape

of Initial Teacher Education ITE in primary schools in South Africa Considering recent policy directives and initiatives it highlights the dilemmas of ITE for the primary school and gives a thorough account of innovations and initiatives to improve ITE The book presents what works best for quality preparation of teachers in the Global South where many children rely on their teachers and school life to break the cycle of poverty Chapters draw on evidence from workplace learning pre service study and primary school teacher education policy to highlight examples of promising change in teacher education in South Africa addressing the clichés of theory versus practice head on This book successfully brings out the challenging aspects of teacher education for childhood learning which has otherwise been regarded as the softer option for a career in education This book will be of great interest for academics researchers and post graduate students in the fields of teacher education African education educational policy international education and comparative education
