Handbook of Petroleum and Natural Gas Engineering: Volume 1 William C. Lyons,1996-10-16 Petroleum engineering now has its own true classic handbook that reflects the profession's status as a mature major engineering discipline. Formerly titled the Practical Petroleum Engineer's Handbook by Joseph Zaba and W T Doherty, editors, this new completely updated two volume set is expanded and revised to give petroleum engineers a comprehensive source of industry standards and engineering practices. It is packed with the key practical information and data that petroleum engineers rely upon daily. The result of a fifteen year effort, this handbook covers the gamut of oil and gas engineering topics to provide a reliable source of engineering and reference information for analyzing and solving problems. It also reflects the growing role of natural gas in industrial development by integrating natural gas topics throughout both volumes. More than a dozen leading industry experts, academia and industry contributed to this two volume set to provide the best most comprehensive source of petroleum engineering information available.

Drilling for Water Raymond Rowles,2017-09-29 There have been very few if any books of a practical nature covering the art of drilling holes in the ground especially for water. Some rather lengthy tomes are and have been available over the years which have been pretty well incomprehensible to the average field man or indeed those responsible for the administration of field operations. Most of those books have been written by people with peripheral disciplines to the industry thus haven't had the field experience to really get hold of the heart of the matter. **Drilling for Water 2** has been written to be understandable to field personnel and in their own terms. Everything in it is based on considerable field experience. Following the publication of **Drilling for Water** many accolades were forthcoming such as packed with information, my bible, most welcome, a breath of fresh air, couldn't put it down, etc. OGJ NEWSLETTER ,1984
