Command terms

Classification of command terms

In the learning outcomes (see syllabus content) the command terms are associated with assessment objectives 1, 2 or 3 and indicate the depth of understanding that is required of students in relation to each item of content. The grouping of command terms under assessment objectives reflects the cognitive demand of each term and is related to Bloom's taxonomy.

A command term used in an examination question will be:

- the same as that specified in the related learning outcome, or
- another command term associated with the same assessment objective, or
- a command term of less cognitive demand.

For example, if a learning outcome begins with the command term "explain", an examination question based on this learning outcome could contain the command term "explain", another command term associated with assessment objective 2 (such as "analyse"), or a command term associated with assessment objective 1 (such as "describe"), but not a command term associated with assessment objective 3 (such as "evaluate").

The Politics of Fear in South Sudan Daniel Akech Thiong, 2021-04-22 When asked in 2016 if he would step down as President of South Sudan Salva Kiir replied my exit could spark genocide Kiir's words exemplify how fear and the threat of mass violence have become central to the politics of South Sudan As South Sudanese analyst Daniel Akech Thiong shows it is this politics that lies at the heart of the country's seemingly intractable civil war In this book Akech Thiong

explores the origins of South Sudan's politics of fear Weaving together social economic and cultural factors into a comprehensive framework he reveals how the country's elites have exploited ethnic divisions as a means of mobilising support and securing their grip on power in the process triggering violent conflict He also considers the ways in which this politics of fear takes root among the wider populace exploring the role of corruption social media and state coercion in spreading hatred and fostering mass violence As regimes across Africa and around the world become increasingly reliant on their own politics of fear Akech Thiong's book offers novel insight into a growing phenomenon with implications far beyond South Sudan

Recent Advances in Symbiosis Research: Integrative Approaches M. Pilar Francino, Mónica

Medina, 2017-02-02 Traditionally symbiosis research has been undertaken by researchers working independently of one another and often focused on a few cases of bipartite host symbiont interactions New model systems are emerging that will enable us to fill fundamental gaps in symbiosis research and theory focusing on a broad range of symbiotic interactions and including a variety of multicellular hosts and their complex microbial communities In this Research Topic we invited researchers to contribute their work on diverse symbiotic networks since there are a large variety of symbioses with major roles in the proper functioning of terrestrial or aquatic ecosystems and we wished the Topic to provide a venue for communicating findings across diverse taxonomic groups A synthesis of recent investigations in symbiosis can impact areas such as agriculture where a basic understanding of plant microbe symbiosis will provide foundational information on the increasingly important issue of nitrogen fixation climate change where anthropogenic factors are threatening the survival of marine symbiotic ecosystems such as coral reefs animal and human health where unbalances in host microbiomes are being increasingly associated with a wide range of diseases and biotechnology where process optimization can be achieved through optimization of symbiotic partnerships Overall our vision was to produce a volume of works that will help define general principles of symbiosis within a new conceptual framework in the road to finally establish symbiology as an overdue central discipline of biological science
