*Transforming Warriors* Peter Haldén, Peter Jackson, 2016-05-12 This volume offers an interdisciplinary study of how different cultures have sought to transform individuals into warriors War changes people however a less explored question is how different societies want people to change as they are turned into warriors When societies go to war they recognize that a boundary is being crossed The participants are expected to do things that are otherwise prohibited or at least governed by different rules This edited volume analyses how different cultures have conceptualized the transformations of an individual passing from a peacetime to a wartime existence to become an active warrior Despite their differences all societies grapple with the same question how much of the individual's peace self should be and can be retained in the state of war The book explores cases such as the Nordic berserkers the Japanese samurai and European knights as well as modern soldiers in Germany Liberia and Sweden It shows that archaic and modern societies are more similar than we usually think both kinds of societies use myths symbols and rituals to create warriors Thus this volume seeks to redefine theories of modernization and secularization It shows that military organizations need to take myths symbols and rituals seriously in order to create effective units This book will be of much interest to students of military studies war studies sociology religion and international relations in general

Anttiroiko, 2015-06-02 New Urban Management discusses how the logic of economic flows poses a challenge to local governments throughout the world The book argues that the increased fluidity in economic life must have its reflection in local economic development policy Out of the Darkness Frank Trentmann, 2024-02-20 Shortlisted for the Wolfson History Prize One of The Telegraph's 50 Best Books of 2023 Named a Best Book of 2024 by Kirkus Reviews A gripping and nuanced history of the German people from the Second World War to the present day including hugely revealing new primary source material on every aspect of its transformation In 1945 Germany lay ruined Its citizens stood condemned by history responsible for a horrifying genocide and war of extermination But by the end of Angela Merkel's tenure in 2021 Germany looked like the moral voice of Europe welcoming over one million refugees holding together the tenuous threads of the European Union and making military restraint the center of its foreign policy At

the same time its rigid fiscal discipline and energy deals with Russian leader Vladimir Putin have cast a shadow over the present Innumerable scholars have asked how Germany could have degenerated from a nation of scientists poets and philosophers into one responsible for genocide And yet until now a similarly vital question has been ignored That is how did a nation whose past has been marked by mass murder a people who cheered Adolf Hitler reinvent themselves Trentmann tells this dramatic story from the middle of the Second World War through the Cold War and the division of East and West to the fall of the Berlin Wall and Germany's struggle to find its place in the world today This journey includes a series of internal moral conflicts admissions of guilt and shame vying with immediate economic concerns restitution for some but not others tolerance versus racism compassion versus complicity Through a range of voices German soldiers and German Jews displaced persons in limbo East German women and shopkeepers angry about energy shortages opponents and supporters of nuclear power volunteers helping migrants and refugees and right wing populists attacking them Trentmann paints a remarkable and surprising portrait of the German people over eighty years showing how they became who they are today

Political Islam at the Crossroads Ayfer Erdogan, Shaimaa Magued, 2025-07-24 A comparative analysis of Islamist groups ideological positioning toward nation state secularism and democracy across different countries in the MENA region Authoritarian reassertion following the Arab uprisings in the Middle East has restrained Islamists political participation and challenged their survival as both opposition groups and rulers In light of national sociopolitical variations across the region this book explores Islamists means of adaptation and resilience in the face of this political exclusion unpacking Islamists sociopolitical persistence and ideological sustainability In doing so this book sheds light on the following questions How did Islamists adapt to contextual restrictions in terms of repression and stigmatization How did the Arab uprisings impact their internal debates ideological revisions and reconsideration of tools of action Individual chapters explore similarities and divergences among Islamist groups and parties in terms of ideological affiliations means of survival and political participation strategies drawing

on comparative cases from across the MENA region Examples include the Muslim Brotherhood in Egypt Al Nahda in Tunisia the AKP Justice and Development Party in Turkey Hezbollah in Lebanon Hamas in Palestine and the Islamic State in Syria and Iraq These studies engage critically with conceptual debates related to Islamism post Islamism Jihadist Islam and the Islamic nation community ummah to determine the trajectory of political Islam in the MENA **The Secular State Under Siege** Christian Joppke, 2015-04-22 Throughout human history religion and politics have entertained the most intimate of connections as systems of authority regulating individuals and society While the two have come apart through the process of secularization secularism is challenged today by the return of public religion This cogent analysis unravels the nature of the connection disconnection and attempted reconnection between religion and politics in the West In a comparison of Western Europe and North America Christianity and Islam Joppke advances far reaching theoretical historical and comparative political arguments With respect to theory it is argued that only a substantive concept of religion as pertaining to the existence of supra human powers opens up the possibility of a historical comparative perspective on religion At the level of history secularization is shown to be the distinct outcome of Latin Christianity itself And at the level of comparative politics the Christian Right in America which has attacked the wall of separation between religion and state and Islam in Europe with the controversial insistence on sharia law and other illiberal claims from some quarters are taken to be counterpart incarnations of public religion and challenges to the secular state This clearly argued sweeping book will provide an invaluable framework for approaching an array of critical issues at the intersection of religion law and politics for advanced students and researchers across the social sciences and legal studies as well as for the interested public **Rethinking Democracy Promotion in International Relations** Jessica Schmidt, 2015-08-20 This book traces and conceptualises the changing notion of democracy and demonstrates how democracy promotion finds itself at the heart of contemporary international discourses and policies Democracy promotion is widely considered to constitute a hypocritical and failed grand international narrative of the 1990s and has allegedly been replaced by other more pressing and academically more captivating concerns such as conflict management statebuilding and climate change This book challenges this position and argues that the core notions of democracy promotion such as empowerment inclusion and responsiveness are a key concern of contemporary international policymakers Drawing on the work of Michel Foucault Hannah Arendt as well as John Dewey it investigates the notion of democracy and modality of its promotions through the policy fields of conflict management statebuilding and climate change The central development the book observes is the reconceptualisation of democracy from the constituted sphere of the public to the lived relations of the social The book argues that the novel rationality of democracy and its promotion offers a particular solution to governing impasses in a world perceived to be globalised and complex which accounts for democracy's current but neglected centrality This book will be of much interest to students of democracy intervention statebuilding global governance and IR in general **Conscripts of Migration** Christopher Ian

Foster,2019-08-23 In *Conscripts of Migration* Neoliberal Globalization Nationalism and the Literature of New African Diasporas author Christopher Ian Foster analyzes increasingly urgent questions regarding crises of global immigration by redefining migration in terms of conscription and by studying contemporary literature Reporting on immigration whether liberal or conservative popular or scholarly leaves out the history in which the Global North helped create outward migration in the Global South From histories of racial capitalism the trans Atlantic slave trade and imperialism to contemporary neoliberal globalization and the resurgence of xenophobic nationalism countries in the Global North continue to devastate and destabilize the Global South Britain France Italy and the United States in different ways police the effects of their own global policies at their borders Foster provides a substantial study of a new body of contemporary African diasporic literature called *migritude* literature *Migritude* indicates the work and ideas of a disparate yet distinct group of younger African authors born after independence in the 1960s Most often *migritude* authors have lived both in and outside Africa and narrate the experiences of migration under the pressures of globalization They also emphasize that immigration itself and stereotypes of the immigrant are entangled with the history of colonialism Authors like Fatou Diome Shailja Patel Abdourahman Waberi Cristina Ali Farah and others confront critical issues of migrancy diaspora departure return racism identity gender sexuality and postcoloniality

**Tocqueville and Beaumont** Andreas Hess,2018-01-09 This is the first concise study to give full credit to the collaboration of works between French nobleman writer and politician Alexis de Tocqueville 1805 59 and his travel companion and friend Gustave de Beaumont 1802 66 and puts this collaboration into its social historical and theoretical context It accompanies the two friends to the US and analyses the fruitful encounter between the New and the Old World that was the result of that journey particularly in relation to emerging Atlantic democracies and revolutions This includes the hopes but also the problems and contradictions that they have come to represent The book also follows Tocqueville and Beaumont to England Ireland and Algeria It discusses their political careers and their engagement in the abolitionist movement their fight for liberal social and political reform as well as their futile attempt to rationalize French colonization in Algeria

Institutions, Interaction and Social Theory Will Gibson,Dirk vom Lehn,2016-01-01 From hospitals and prisons to schools and corporations no matter how large or seemingly abstract all institutions are ultimately the result of the actions and interactions of people In this original and innovative text Gibson and Vom Lehn show the different ways in which studying people s own meaning making practices can help us understand the role of institutions in contemporary society *Institutions Interaction and Social Theory* takes the reader through the core conceptual foundations of Symbolic Interactionism Ethnomethodology and Conversation Analysis Engaging with a rich tradition in sociological thought it suggests that interactionist perspectives have remained largely absent in the study of institutions and how they contrast with and contribute to the broader field of research in institutional contexts With chapters on healthcare education markets and art and culture this text will be of interest to those studying institutions organisations and work in sociology and in business

schools It will also be valuable for students of social theory interested in interactionism and in the challenges and opportunities of connecting complex theoretical discussions to real world examples     The Art and Science of Sociology Roland Robertson, John Simpson, 2016-07-06 The book consists of a volume of essays in honor of the outstanding sociologist Edward A Tiryakian whose work has spanned a considerable number of countries regions and topics He has been highly influential particularly in American and French sociology     Public Theology, Religious Diversity, and Interreligious Learning Manfred L.
