**Meaning Systems and Mental Health Culture**, James T. Hansen, 2016-02-01 The creation of meaning is a central feature of human life The full spectrum of experience from joyful devoted living to unbearable psychological suffering is

orchestrated by the meanings that people endorse and create Meaning Systems and Mental Health Culture Critical Perspectives on Contemporary Counseling and Psychotherapy examines the intersection of meaning systems mental health culture and counseling and psychotherapy By viewing mental health care through the lenses of culture and history James T Hansen argues that a defining element of mental health culture throughout various eras is the relative value placed on meaning systems Contemporary mental health care with its idealization of symptom based diagnostics biological reductionism and the medical model severely devalues meaning systems This devaluation has led modern counselors and psychotherapists to largely abandon the factors that should be central to their work Meaning Systems and Mental Health Culture weaves together empirical historical cultural and philosophical perspectives to raise awareness of the need for counseling and psychotherapy to revalue meaning systems even while operating within a culture that disregards them

Philips Long, Richard A. Muller, Vern S. Poythress, 1996 This one volume edition of the Foundations of Contemporary Interpretation series explores current issues in the interpretation of the Bible from the perspective of specific academic disciplines history literary criticism science and theology Theorizing Composition Mary Kennedy, 1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has

expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works

Black Flesh Matters Vincent L. Wimbush, 2022-03-18 These essays written over more than thirty years of Vincent L Wimbush's career as a scholar provide a response to the nearly universal persistent and

Because Wimbush is a scholar of religion as culture having to do with social practices and their psycho politics as regimes of knowledge discourse formation and power relations his ex centric transdisciplinary interest in scriptures has been viewed in some circles as controversial Yet it is Wimbush s linkage of the modern hyper signification of Black flesh leading to racialization and racism especially anti Black racism to the scriptural as shorthand for discourse and relations of power that makes this work compelling
