Previs, 2024-12-15 On July 20 1969 Americans not only landed on the Moon but the televised spectacle forever changed the ways in which news and commentary about historical events would be presented to audiences In *The Rhetoric of Project Apollo* Kathy Previs provides a comprehensive analysis of the rhetorical strategies that CBS News employed in covering the Apollo missions from 1968 1972 and documents the role that NASA's public relations office had in televising the exciting moonshots She illustrates how

CBS's and NASA's symbolic representations followed a ritual view of communication enabling viewers to make sense of complex technological feats and scientific discoveries while garnering public support for the costly missions. Based on four rhetorical categories: nationalism, romanticism, pragmatism, and technology, Previs also provides an in-depth analysis of which narratives have withstood the test of time in how Apollo is remembered on CBS News and across a variety of televised platforms including CNN, the History Channel, and PBS from 1973-2022, marking the 50th anniversary of Apollo's last mission. From Cold War metaphors to now recognizing the role women had in Apollo's successes, its story continues to resonate with and inspire audiences around the world.

*Everyone's Gone to the Moon* Joe Cuhaj, 2023-10-17 Much has been written about the legendary flight of Apollo 11 and mankind's first tentative steps into deep space. It's often said that the world stopped watching in awe as the crew of Apollo 11 completed their mission. It is true that in that moment almost everyone had virtually gone to the moon as people around the world gazed in wonderment at the grainy black and white images of Neil Armstrong taking that first step onto the surface of another world. But that was a fleeting moment and just as quickly the moment was gone. Wars raged, on protestors filled the streets, and average Americans went back to their daily lives. Everyone's Gone to the Moon is a week-by-week journey through July 1969, one of the most pivotal months in human history in space and here on Earth. This unique book follows the crew of Apollo 11 and NASA as they prepare for the historic first lunar landing alongside the major global events buried beneath headlines covering the historic space mission. Interwoven with the story of Apollo 11 are the events on our home planet that made an equally important impact on who we were then and who we are today: the Life of Prince Charles was threatened by a terrorist attack in Wales; the storm dubbed the Ohio Fireworks Derecho ripped through the Midwest, killing dozens; the assassination of Kenyan Economic Minister Tom Myoba, of which Barack Obama Sr. was a key witness, undercut a nation just learning to stand on its own; Senator Ted Kennedy was involved in a mysterious accident in Chappaquiddick, Massachusetts; ARPANET, the first real Internet, was unveiled; Monty Python was born; John Lennon and Paul McCartney released "Give Peace a Chance" during escalated Vietnam War tensions; Midnight Cowboy stunned the Academy Awards; and much more. Meanwhile, NASA was still scrambling. Everyone's Gone to the Moon features little-known behind-the-scenes stories of the moon landing, like how NASA had to grapple with media, the technical issues that still plagued the lunar module, and how the prior crew of Apollo 10 suffered incredible itching from their spacesuits that needed correcting before Apollo 11 could even be launched. This deep dive into the Apollo 11 mission's most crucial weeks and the little-known and rarely remembered events occurring simultaneously back on Earth gives a vivid new perspective to the month that launched humanity into the future.

**The Bootleg Guide** Garry Freeman, 2003-07-14 The Bootleg Guide is the ultimate in reference works for the 1960s and the 1970s bootleg recordings. Within these pages lies a history of rock at its best as performed on stage or in the studio. Each entry is catalogued by title, date, featured tracks, and contains a quality rating and comments on the nature and origin of the recording. Cross-references are provided to other titles and extensive

information is available on alternate titles of bootlegs In many cases quirky facts about a particular title are given something that in itself may make a title a highly desirable and sought after rarity amongst collectors Limited editions are listed to help the reader and collector develop a clearer picture of just how obtainable a bootleg may be Bootlegs are unofficial live and studio recordings of artists and bands that are released onto vinyl tape or CD By definition most are so rare that they change hands only for vastly inflated sums or are traded by networks of dedicated collectors worldwide Serious fans and collectors have been known to spend as much as 225 for an original scratchy vinyl recording of bands like Deep Purple and the Grateful Dead dating back to the early seventies The rarest of all are akin to valuable paintings as far as collectors and traders are concerned

**For All Mankind** Harry Hurt, 2019-07-16 Far more than a history of lunar exploration Hurt is at his best in the deft sketches of the astronauts as they were and as they became Chicago Tribune Between December 1968 and December 1972 twenty four men captured the imagination of the world as they voyaged to the moon In For All Mankind Harry Hurt III presents a dramatic engrossing and expansive account of those journeys Based on extensive research and exclusive interviews with the Apollo astronauts For All Mankind remains one of the most comprehensive and revealing firsthand accounts of space travel ever assembled In their own words the astronauts share the sights sounds thoughts fears hopes and dreams they experienced during their incredible voyages In a compelling narrative structured as one trip to the moon Harry Hurt recounts all the drama and danger of the lunar voyages from the anxiety of the astronauts prelaunch procedures through the euphoria of touchdown on the lunar surface Updated with a new introduction by the author for the 50th anniversary of the Apollo 11 moon landing For All Mankind is both an extraordinary adventure story and an important historical document Hurt s timely book is like an instant replay of the dramatic moon flight years Hurt tells us of the hardships and the successes of the Apollo program the remarkable journey to the moon of the astronauts and technicians who made it possible and the goals of the nation in space Houston Chronicle The meat here lies in the lunar voyage itself an irresistible mix of danger courage tedium and spectacle evoked with unprecedented detail by those who went there Kirkus Reviews

**Dark Side of the Moon** Gerard Degroot, 2006-11-01 A selection of the History Scientific American and Quality Paperback Book Clubs For a very brief moment during the 1960s America was moonstruck Boys dreamt of being an astronaut girls dreamed of marrying one Americans drank Tang bought space pens that wrote upside down wore clothes made of space age Mylar and took imaginary rockets to the moon from theme parks scattered around the country But despite the best efforts of a generation of scientists the almost foolhardy heroics of the astronauts and 35 billion dollars the moon turned out to be a place of magnificent desolation to use Buzz Aldrin's words a sterile rock of no purpose to anyone In Dark Side of the Moon Gerard J DeGroot reveals how NASA cashed in on the Americans thirst for heroes in an age of discontent and became obsessed with putting men in space The moon mission was sold as a race which America could not afford to lose Landing on the moon it was argued would be good for the economy for politics and for the soul It could even win the Cold War The great tragedy is that so much effort and expense was devoted to a small step that did virtually nothing for mankind Drawing on meticulous archival research DeGroot cuts through the myths constructed by the Eisenhower Kennedy and Johnson administrations and sustained by NASA ever since He finds a gang of cynics demagogues scheming politicians and corporations who amassed enormous power and profits by exploiting the fear of what the Russians might do in space Exposing the truth behind one of the most revered fictions of American history Dark Side of the Moon explains why the American space program has been caught in a state of purposeless wandering ever since Neil Armstrong descended from Apollo 11 and stepped onto the moon The effort devoted to the space program was indeed magnificent and its cultural impact was profound but the purpose of the program was as desolate and dry as lunar dust

**APOLLO: A Decade of Achievement** Paul I. Casey, 2013-10-25 The race for space begins on October 4 1957 as the Soviet Union stuns the world and launches the first man made satellite a feat until then only read about in science fiction America is caught unprepared for 1957 and must answer this embarrassment to the world by proving its superiority however each time America tries to launch a satellite let alone test a new rocket it fails How could America have taken a back seat in the missile race How did America take the lead and win the race to the moon in as little as ten years How did America gain the necessary technology and ingenuity to not only launch men into outer space but also land them on the moon and safely return Why did man even go to the moon How has the space program affected our lives today Casey spent his life researching the space program and interviewing many people involved in it from scientists to astronauts to find answers to these questions Casey an accomplished technical writer astronomy columnist and artist began to write this book after he was inspired as a young child when he witnessed along with the rest of the world Apollo 11 land three men on the moon in 1969 Casey enjoyed educating

students about the space program and wrote this book to share an enthusiasm about science especially for those never thought about looking up at the night sky and wondering about the stars Casey wanted students to ask questions and to gain a perspective on how incredible science is But mostly he wanted to inspire students to pursue a career in science to continue the peaceful exploration of space for generations to come No Requiem for the Space Age Matthew D. Tribbe, 2014-06-06 During the summer of 1969 the summer Americans first walked on the moon musician and poet Patti Smith recalled strolling down the Coney Island Boardwalk to a refreshment stand where pictures of Jesus President Kennedy and the astronauts were taped to the wall behind the register Such was the zeitgeist in the year of the moon Yet this holy trinity of 1960s America would quickly fall apart Although Jesus and John F Kennedy remained iconic by the time the Apollo Program came to a premature end just three years later few Americans mourned its passing Why did support for the space program decrease so sharply by the early 1970s Rooted in profound scientific and technological leaps rational technocratic management and an ambitious view of the universe as a realm susceptible to human mastery the Apollo moon landings were the grandest manifestation of postwar American progress and seemed to prove that the United States could accomplish anything to which it committed its energies and resources To the great dismay of its many proponents however NASA found the ground shifting beneath its feet as a fierce wave of anti rationalism arose throughout American society fostering a cultural environment in which growing numbers of Americans began to contest rather than embrace the rationalist values and vision of progress that Apollo embodied Shifting the conversation of Apollo from its Cold War origins to larger trends in American culture and society and probing an eclectic mix of voices from the era including intellectuals religious leaders rock musicians politicians and a variety of everyday Americans Matthew Tribbe paints an electrifying portrait of a nation in the midst of questioning the very values that had guided it through the postwar years as it began to develop new conceptions of progress that had little to do with blasting ever more men to the moon No Requiem for the Space Age offers a narrative of the 1960s and 1970s unlike any told before with the story of Apollo as the story of America itself in a time of dramatic cultural change Liberal Crusader Gerard De Groot, 1993-05 Sinclair from northern Scotland was leader of the British Liberal Party 1935-45 and is credited with modernizing the 19th century organizational and ideological dinosaur He was also Air Minister in the coalition government during World War II Much of the biography is drawn from unpublished correspondence between him and Winston Churchill both a close friend and political adversary Annotation copyright by Book News Inc Portland OR Ebony, 1998-10 EBONY is the flagship magazine of Johnson Publishing Founded in 1945 by John H Johnson it still maintains the highest global circulation of any African American focused magazine **All Joking Aside** Rebecca Krefting, 2014-09-01 A professor of American Studies and stand up comic examines sharply focused comedy and its cultural utility in contemporary society Outstanding Academic Title Choice In this examination of stand up comedy Rebecca Krefting establishes a new genre of comedic production charged humor and charts its pathways from production to consumption Some jokes are tears in the

fabric of our beliefs they challenge myths about how fair and democratic our society is and the behaviors and practices we enact to maintain those fictions Jokes loaded with vitriol and delivered with verve charged humor compels audiences to action artfully summoning political critique Since the institutionalization of stand up comedy as a distinct cultural form stand up comics have leveraged charged humor to reveal social political and economic stratifications All Joking Aside offers a history of charged comedy from the mid twentieth century to the early aughts highlighting dozens of talented comics from Dick Gregory and Robin Tyler to Micia Mosely and Hari Kondabolu The popularity of charged humor has waxed and waned over the past sixty years Indeed the history of charged humor is a tale of intrigue and subversion featuring dive bars public remonstrations fickle audiences movie stars turned politicians commercial airlines emergent technologies neoliberal mind sets and a cavalcade of comic misfits with an ax to grind Along the way Krefting explores the fault lines in the modern economy of humor why men are perceived to be funnier than women the perplexing popularity of modern day minstrelsy and the way identities are packaged and sold in the marketplace Appealing to anyone interested in the politics of humor and generating implications for the study of any form of popular entertainment this history reflects on why we make the choices we do and the collective power of our consumptive practices Readers will be delighted by the broad array of comic talent spotlighted in this book and for those interested in comedy with substance it will offer an alternative punchline **Dazed and Confused** Richard Linklater,1993-09-15 Uses ads cartoons and newspaper articles from the seventies and profiles of characters from the movie to offer a satiric look at the period
