No Ordinary Disruption Richard Dobbs, James Manyika, Jonathan Woetzel, 2016-08-30 Our intuition on how the world works could well be wrong We are surprised when new competitors burst on the scene or businesses protected by large and deep moats find their defenses easily breached or vast new markets are conjured from nothing Trend lines resemble saw tooth mountain ridges The world not only feels different The data tell us it is different Based on years of research by the directors of the McKinsey Global Institute No Ordinary Disruption The Four Forces Breaking all the Trends is a timely and important analysis of how we need to reset our intuition as a result of four forces colliding and transforming the global economy the rise of emerging markets the accelerating impact of technology on the natural forces of market competition an aging world population and accelerating flows of trade capital and people Our intuitions formed during a uniquely benign period for the world economy often termed the Great Moderation Asset prices were rising cost of capital was falling labour and resources were abundant and generation after generation was growing up more prosperous than their parents But the Great Moderation has gone The cost of capital may rise The price of everything from grain to steel may become more volatile The world's labor force could

shrink Individuals particularly those with low job skills are at risk of growing up poorer than their parents What sets No Ordinary Disruption apart is depth of analysis combined with lively writing informed by surprising memorable insights that enable us to quickly grasp the disruptive forces at work For evidence of the shift to emerging markets consider the startling fact that by 2025 a single regional city in China Tianjin will have a GDP equal to that of the Sweden of that in the decades ahead half of the world s economic growth will come from 440 cities including Kumasi in Ghana or Santa Carina in Brazil that most executives today would be hard pressed to locate on a map What we are now seeing is no ordinary disruption but the new facts of business life facts that require executives and leaders at all levels to reset their operating assumptions and management intuition

The Myth of Chinese Capitalism Dexter Roberts, 2020-03-10 The vivid provocative untold story of how restrictive policies are preventing China from becoming the world s largest economy Evan Osnos Dexter Roberts lived in Beijing for two decades working as a reporter on economics business and politics for Bloomberg Businessweek In The Myth of Chinese Capitalism Roberts explores the reality behind today s financially ascendant China and pulls the curtain back on how the Chinese manufacturing machine is actually powered He focuses on two places the village of Binghuacun in the province of Guizhou one of China s poorest regions that sends the highest proportion of its youth away to become migrants and Dongguan China s most infamous factory town located in Guangdong home to both the largest number of migrant workers and the country s biggest manufacturing base Within these two towns and the people that move between them Roberts focuses on the story of the Mo family former farmers turned migrant workers who are struggling to make a living in a fast changing country that relegates one half of its people to second class status via household registration land tenure policies and inequality in education and health care systems In The Myth of Chinese Capitalism Dexter Roberts brings to life the problems that China and its people face today as

they attempt to overcome a divisive system that poses a serious challenge to the country's future development. In so doing, Roberts paints a boots-on-the-ground cautionary picture of China for a world now held in its financial thrall. Praise for *The Myth of Chinese Capitalism*: A gimlet-eyed look at an economic miracle that may not be so miraculous after all. Kirkus Reviews: A clearheaded and persuasive counter narrative to the notion that the Chinese economic model is set to take over the world. Readers looking for an informed and nuanced perspective on modern China will find it here. Publishers Weekly: A sophisticated and readable take of China's triumphs and crises. A first-hand witness to China's transformation over the past quarter century. Roberts credibly challenges the myth of China's inevitable rise and global dominance. Ian Johnson: Pulitzer Prize-winning author and Beijing-based correspondent. A potent mix of personal stories and deft analysis. *The Myth of Chinese Capitalism* takes a hard look at China's migrants and rural people. Mei Fong: Pulitzer Prize-winning journalist and author of *One Child: The Story of China's Most Radical Experiment*. Discovering Leadership: Anthony Middlebrooks, Scott J. Allen, Mindy S. McNutt, James L. Morrison, 2023-05-12. *Discovering Leadership: Designing Your Success*, Second Edition, provides a comprehensive practice-based introduction to leadership. The text guides students to design their leadership purposefully and mindfully as they develop their leadership knowledge, skills, and dispositions. **Facebook Nation**: Newton Lee, 2022-02-02. This book explores total information awareness empowered by social media. At the FBI Citizens Academy in February 2021, I asked the FBI about the January 6 Capitol riot organized on social media that led to the unprecedented ban of a sitting U.S. President by all major social networks. In March 2021, Facebook CEO Mark Zuckerberg, Google CEO Sundar Pichai, and Twitter CEO Jack Dorsey appeared before Congress to face criticism about their handling of misinformation and online extremism that culminated in the storming of Capitol Hill. With more than three billion monthly active users, Facebook's family of apps is by far the world's largest social network. Facebook as a nation is bigger than the top three most populous countries in the world: China, India, and the United States. Social media has enabled its users to inform and misinform the public, to appease and disrupt Wall Street, to mitigate and exacerbate the COVID-19 pandemic, and to unite and divide a country. Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." He should have heeded his own words. In October 2021, former Facebook manager turned whistleblower Frances Haugen testified at the U.S. Senate that Facebook's products harm children, stoke division, and weaken our democracy. This book offers discourse and practical advice on information and misinformation, cybersecurity, and privacy issues, cryptocurrency, and business intelligence, social media marketing, and caveats to government and activism, as well as the pros and cons of total information awareness, including the Edward Snowden leaks. Highly recommended. T. D. Richardson: *Choice Magazine*. A great book for social media experts. Will M. AdWeek: Parents in particular would be well advised to make this book compulsory reading for their teenage children. David B. Henderson: *ACM Computing Reviews*. **Chinese Business**: Hong Liu, 2017-07-14. It is difficult to overstate the importance of China to the world economy, and yet the majority of books either look at Chinese business by applying Western frameworks

or models to the context of China or focus on a particular aspect of business in China Authored by an academic expert on China this new completely revised edition of Chinese Business offers its readers a comprehensive and systematic body of knowledge of Chinese business It has taken a holistic perspective intending to achieve a balance between the academic and practical between theory and practice and between traditional and current Internet based industry The framework of this book subsumes all the major factors that should be taken into consideration when Western companies contemplate a China strategy including history philosophy ancient military classics strategy and marketing innovation Internet business and human resources The discussion of these factors is supplemented with insightful case studies Chinese Business Second Edition can be used as a textbook for undergraduates and postgraduates at business schools and as a useful reference for researchers senior executives consultants and government officials involved in Chinese business

Making Great Strategy Glenn R. Carroll,Jesper B. Sørensen,2021-01-26 Making strategy requires undertaking major often irreversible decisions aimed at long term success in an uncertain future All leaders must formulate a clear course of action yet many lack confidence in their ability to think systematically about their strategy They struggle to apply the abstract lessons offered by conventional approaches to strategic analysis to their unique contexts *Making Great Strategy* resolves these challenges with a straightforward readily applicable framework Jesper B S rensen and Glenn R Carroll show that one factor underlies all sustainably successful strategies a logically coherent argument that connects resources capabilities and environmental conditions to desired outcomes They introduce a system for formulating and managing strategy through a set of three core activities visualization formalization and logic and constructive argumentation These activities can be implemented in any organization and are illustrated through examples and case studies from well known companies such as Apple Walmart and The Economist This book shows that while great strategic thinking is hard it is not a mystery Widely applicable and relevant for managers and leaders at all levels especially executive teams charged with setting the course of their organizations it is essential reading for anyone faced with practical problems of strategic management
