Schuster, 2015-10-06 Microcredit is part of a global trend of financial inclusion that brings banking services especially small loans to the world s poor In this book Caroline Schuster explores Paraguayan solidarity lending as a window into the tensions between social development and global finance Social Collateral tracks collective debt across the commercial society and smuggling economies at the Paraguayan border by examining group loans made to women by

nonprofit development programs These highly regulated loans are secured through mutual support and peer pressure social collateral rather than through physical collateral This story of social collateral necessarily includes an interwoven account about the feminization of solidarity lending At its core is an economy of gender from pink collar financial work to men s committees to women smugglers At stake are interdependencies that bind borrowers and lenders financial technologies and Paraguayan development in ways that structure both global inequality and global opportunity

*Doctrine and Reform in the British Cavalry 1880-1918* Stephen Badsey, 2016-12-05 A prevalent view among historians is that both horsed cavalry and the cavalry charge became obviously obsolete in the second half of the nineteenth century in the face of increased infantry and artillery firepower and that officers of the cavalry clung to both for reasons of prestige and stupidity It is this view commonly held but rarely supported by sustained research that this book challenges It shows that the achievements of British and Empire cavalry in the First World War although controversial are sufficient to contradict the argument that belief in the cavalry was evidence of military incompetence It offers a case study of how in reality a practical military doctrine for the cavalry was developed and modified over several decades influenced by wider defence plans and spending by the experience of combat by Army politics and by the rivalries of senior officers Debate as to how the cavalry was to adjust its tactics in the face of increased infantry and artillery firepower began in the mid nineteenth century when the increasing size of armies meant a greater need for mobile troops The cavalry problem was how to deal with a gap in the evolution of warfare between the mass armies of the later nineteenth century and the motorised firepower of the mid twentieth century an issue that is closely connected with the origins of the deadlock on the Western Front Tracing this debate this book shows how despite serious attempts to learn from history both European style wars and colonial wars produced ambiguous or disputed evidence as to the future of cavalry and doctrine was largely a matter of what appeared practical at the time
