The Lab Book Sheldon Judson, 2000. For the laboratory course accompanying a first year Physical Geology or Geoscience course. Useful in courses in Environmental Geology or Engineering Geology. Designed to be used with any physical geology textbook or collection of course materials, this stand-alone lab manual features 68 exercises covering 19 key geologic topics all in true workbook format so that students can complete lab activities right in the manual. Unique and intuitive, the exercises teach students basic geologic field and lab skills and are based on the principles of scientific inquiry that challenge students to think beyond the activity at hand to the larger questions of applied geologic work. This lab manual features high quality, truly useful maps, diagrams, and photos and does not attempt to repeat the amount of text available in the students' textbook.

Interdisciplinary Teaching About Earth and the Environment for a Sustainable Future David C. Gosselin, Anne E. Egger, J. John Taber, 2018-12-13. *Interdisciplinary Teaching about the Earth and Environment for a Sustainable Future* presents the outcomes of the InTeGrate project, a community effort funded by the National Science Foundation to improve Earth literacy and build a workforce prepared to tackle environmental and resource issues. The chapters in this book explicitly illustrate the intimate relationship between geoscience and sustainability that is often opaque to students. The authors of these chapters are faculty members, administrators, program directors, and researchers from institutions across the country who have collectively envisioned, implemented, and evaluated effective change in their classrooms, programs, institutions, and beyond. This book provides guidance to anyone interested in implementing change on scales ranging from a single course to an entire program by
