The Fukushima Daiichi Nuclear Power Station Disaster The Independent Investigation Fukushima Nuclear Accident,2014-03-05 When the Nuclear Safety Commission in Japan reviewed safety design guidelines for nuclear plants in 1990 the regulatory agency explicitly ruled out the need to consider prolonged AC power loss In other words nothing like the catastrophe at the Fukushima Daiichi Nuclear Power Station was possible no tsunami of 45 feet could swamp a nuclear power station and knock out its emergency systems No blackout could last for days No triple meltdown could occur Nothing like this could ever happen Until it did over the course of a week in March 2011 In this volume and in gripping detail the Independent Investigation Commission on the Fukushima Nuclear Accident a civilian led group presents a thorough and powerful account of what happened within hours and days after this nuclear disaster the second worst in history It documents the findings of a working group of more than thirty people including natural scientists and engineers social scientists and researchers business people lawyers and journalists who researched this crisis involving multiple simultaneous dangers They conducted over 300 investigative interviews to collect testimony from relevant individuals The responsibility of this committee was to act as an external ombudsman summarizing its conclusions in the form of an original report published in Japanese in February 2012 This has now been substantially rewritten and revised for this English language edition The work reveals the truth behind the tragic saga of the multiple catastrophic accidents at the Fukushima Daiichi Nuclear Power Station It serves as a valuable and essential historical reference which will help to inform and guide future nuclear safety and policy in both Japan and internationally

Seasteading Joe Quirk,2017-03-21 In these thought provoking visions of the future The Wall Street Journal Joe Quirk and Patri Friedman of the Seasteading Institute explain how ocean cities can solve many of our environmental technological and civic problems and introduce the visionaries and pioneers who are now making seasteading a reality Our planet has been suffering from serious environmental problems and their social and political consequences But imagine a vast new source of sustainable and renewable energy that would also bring more equitable economies A previously untapped source of farming that could produce significant new sources of nutrition Future societies

where people could choose the communities they want to live in free from the restrictions of conventional citizenship This extraordinary vision of our near future as imagined in Seasteading attracted the powerful support of Silicon Valley s Peter Thiel and it may be drawing close to reality Facing growing environmental threats French Polynesia has already signed on to build some of the world s first seasteads Joe Quirk and Patri Friedman show us how cities built on floating platforms in the ocean will work and they profile some of the visionaries who are implementing basic concepts of seasteading today An entrepreneur s dream these floating cities will become laboratories for innovation and creativity Seasteading offers hope for a future when life on land has grown grim Kirkus Reviews proving the adage that yesterday s science fiction is tomorrow s science fact

The Purpose of Change is Problem Solving Janos Korn,2016-02-28 Any part of the world can be viewed and modelled in terms of its chosen qualitative and or quantitative properties OR its structure The former approach has been used by nearly the whole of human intellectual endeavor i e conventional science of physics the arts etc Development of the latter or the systemic view is the subject matter of the current work The Purpose of Change is Problem Solving suggests that the structural view is empirical pervasive throughout experience and as such results in a single domain as opposed to conventional science which consists of many domains like mechanics electricity etc Thus a unique approach is required which is based on general principles of systems translated into operational form by the symbolism of processed natural language called linguistic modelling of scenarios which can carry mathematics and uncertainties To model scenarios with complex structure a description or story in natural language is expressed in terms of homogenous language of one and two place sentences the elementary constituents of which complex structures can be constructed like a variety of buildings from bricks To correspond to the single domain based on the logic of causation a single scheme of Management producers Product

User consumer is proposed which is immediately applicable to structuring scenarios and guides their detailed linguistic modelling or design The approach subject to debate can have significant impact on society and education especially that of engineering which lacks a comprehensive theory of structure of problematic scenarios

Fundamentals, Properties, and Applications of Polymer Nanocomposites Joseph H. Koo, 2016-10-31 Discusses polymer nanocomposites composed of a family of polymeric materials whose properties are capable of being tailored to meet specific applications

Linguistic Modelling of Scenarios Janos Korn, 2013-12-01 Linguistic Modelling of Scenarios proposes a paradigm change from the systemic VIEW to systems SCIENCE so as to extend the methodology of conventional science of physics into the domains hitherto beyond the reach of this kind of treatment The book I Identifies the problematic issues in current approaches to the systemic or structural view of parts of the world as opposed to the quantitative qualitative views of conventional science of physics and the arts whereby introducing the third culture II Locates the position of the structural view in the context of human intellectual endeavour III Discusses the fundamental questions raised by modelling aspects of human behaviour IV Introduces the basic ideas and the symbolism of linguistic modelling which are then applied to turning descriptions of scenarios as a story or narrative into reasoning schemes V Describes a methodology of problem solving of which design thinking and the operation of purposive systems are seen as essential ingredients Problem solving is a universal activity of living in particular human beings through innovation invention and creativity Lack of this activity leads to death Problem solving is regarded as pivotal point which may propel the spread of the modified structural view into social technical cultural and educational awareness VI Shows the location of aspects of conventional science within the scheme of systems science whereby achieving a continuity of the scientific endeavour VII Outlines a teaching scheme for linguistic modelling Janos Korn explains how a view can be converted into a science which can lead to a possibility of organised speculation or

simulation of behaviour exploring the effects of variation of parameters on performance and the occurrence of outcomes of operations beneficial or not of dynamic structures Static and dynamic structures are expressed in more rigorous and computable terms so that the results of analysis and design of human activity scenarios could be exposed to at least thought experiments Linguistic Modelling of Scenarios is an informative read for any professionals teachers and students of engineering social science management business and production
