Dinner with Darwin Jonathan Silvertown, 2017-09-05 A delectably erudite study of how natural selection has shaped the foods we eat. This intricate scientific banquet is a marvelous read bon app tit Nature. What do eggs flour and milk have in common? They form the basis of waffles of course but these breakfast staples also share an evolutionary function eggs seeds from which we derive flour by grinding and milk have each evolved to nourish offspring. Indeed ponder the genesis of your breakfast lunch or dinner and you'll soon realize that everything we eat and drink has an evolutionary history. *Dinner with Darwin* is a multicourse meal of evolutionary gastronomy a tantalizing tour of human taste that helps us understand the origins of our diets and the foods that have been central to them for millennia from spices to spirits. A delectable concoction of coevolution and cookery gut microbiomes and microherbs and both the chicken and its egg it reveals that our recipe cards and restaurant menus don't just contain the ingredients for culinary delight. They also tell a fascinating story about natural selection and its influence on our plates and palates. Digging deeper Jonathan Silvertown's repast includes entrées into GMOs and hybrids and looks at the science of our sensory interactions with foods and cooking the sights aromas and tastes we experience in our kitchens and dining rooms. As is the wont of any true chef he packs his menu with eclectic components dishing on everything from Charles Darwin's intestinal maladies to taste bud anatomy and turducken. Our evolutionary relationship with food and drink stretches from the days of cave dwellers to contemporary crises and beyond and *Dinner with Darwin* serves up scintillating insight into the entire awesome span. With a wit as dry as a fine pinot noir and a vast cache of evolutionary knowledge Silvertown

Mentoring relationships provide developmental spaces in which students' STEMM skills are honed and pathways into STEMM fields can be discovered. Because mentorship can be so influential in shaping the future STEMM workforce, its occurrence should not be left to chance or idiosyncratic implementation. There is a gap between what we know about effective mentoring and how it is practiced in higher education. The Science of Effective Mentorship in STEMM studies mentoring programs and practices at the undergraduate and graduate levels. It explores the importance of mentorship, the science of mentoring relationships, mentorship of underrepresented students in STEMM, mentorship structures and behaviors, and institutional cultures that support mentorship. This report and its complementary interactive guide present insights on effective programs and practices that can be adopted and adapted by institutions, departments, and individual faculty members.
