

E. How many electrons are in Mg^{2+} ?

10

Activity B:

Electron arrangements

Get the Gizmo ready:

- Create a neutral hydrogen atom (1 proton, 0 neutrons, 1 electron).

Question: How are electrons arranged around the nucleus of an atom?

1. **Observe:** Add electrons to the atom until you have used all the available electrons. How are the electrons arranged?

They are not overlapping and are moving in circular orbits around the nucleus.

2. **Analyze:** Electrons are arranged in orbits called **energy levels**. The Gizmo shows all of the first two energy levels but only part of the third energy level.

A. How many electrons can fit in the first energy level?

2

B. How many electrons can fit in the second energy level?

8

C. How many electrons fit in the part of the third energy level shown?

8

3. **Observe:** Click **Reset** (↺). The electrons in the outermost orbit, called **valence electrons**, help to create chemical bonds. Create a lithium atom (3 protons, 4 neutrons, 3 electrons).

How many valence electrons are in a neutral lithium atom?

1

4. **Diagram:** Turn on **Show electron dot diagram**. The valence electrons of an atom are shown in an **electron dot diagram**. Each dot represents a valence electron. 🖋️ Draw the electron dot diagram for neutral lithium: (Right Click on the element, click "edit", move the dots around Li)

5. **Practice:** Turn off **Show electron dot diagram**. Use the Gizmo to create a neutral atom of each of the following elements. 🖋️ Draw the electron dot diagram for each: (Right Click on the picture, click "edit", move the dots around the element symbols) When you are finished, turn on **Show electron dot diagram** and check your answers.

6. **Extend your thinking:** Many chemical properties are determined by the number of valence electrons. Elements with the same number of valence electrons will have similar properties.

Which element has similar properties to lithium?

Na

Beryllium?

Mg

Explain:

Their valence electron count is same.

What Is the Influence of the National Science Education Standards? National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Science Education K-12, Steering Committee on Taking Stock of the National Science Education Standards: The Research, 2002-12-05

In 2001 with support from National Science Foundation the National Research Council began a review of the evidence concerning whether or not the National Science Education Standards have had an impact on the science education enterprise to date and if so what that impact has been

This publication represents the second phase of a three phase effort by the National Research Council to answer that broad and very important question

Phase I began in 1999 and was completed in 2001 with publication of *Investigating the Influence of Standards A Framework for Research in Mathematics Science and Technology Education* National Research Council 2002

That report provided organizing principles for the design conduct and interpretation of research regarding the influence of national standards

The Framework developed in Phase I was used to structure the current review of research that is reported

here Phase II began in mid 2001 involved a thorough search and review of the research literature on the influence of the NSES and concludes with this publication which summarizes the proceedings of a workshop conducted on May 10 2002 in Washington DC Phase III will provide input collected in 2002 from science educators administrators at all levels and other practitioners and policy makers regarding their views of the NSES the ways and extent to which the NSES are influencing their work and the systems that support science education and what next steps are needed **Supporting Children with Down's Syndrome** Hull City Council,2017-09-19 This practical resource contains a wealth of valuable advice and tried and tested strategies for supporting children and young people with Down s Syndrome Fully updated with the 2014 SEND Code of Practice this text describes the different types of difficulties experienced by pupils with Down s Syndrome and helps practitioners to understand their diverse needs The wide ranging chapters explore a variety of topics including Defining the profile of a pupil with Down s Syndrome Guidelines for working with pupils Addressing behaviour issues The use of ICT Home school liason Assessment It provides guidance and practical strategies for SENCOs teachers and other professionals and parents helping them to feel more confident and be more effective in supporting learners in a variety of settings It also provides materials for in house training sessions and features useful checklists templates and photocopyable resources
