Computers Helping People with Special Needs Klaus Miesenberger, Joachim Klaus, Wolfgang Zagler, Arthur Karshmer, 2008-07-14 Welcome to the proceedings of ICCHP 2008 We were proud to welcome participants from more than 40 countries from all continents to ICCHP The International Programme Committee encompassing 102 experts from all over the world selected 150 full and 40 short papers out of 360 abstracts submitted to ICCHP Our acceptance rate of about half of the submissions demonstrates the scientific quality of the programme and in particular the proceedings you have in your hands An impressive group of experts agreed to organize Special Thematic Sessions STS for ICCHP 2008 The existence of these STS sessions helped to bring the meeting into sharper focus in several key areas of assistive technology In turn this deeper level of focus helped to bring together the state of the art and mainstream technical social cultural and political developments Our keynote speaker Jim Fruchterman from BeneTech USA highlighted the importance of giving access to ICT and AT at a global level In another keynote by Håvard Thimbleby Swansea University UK the role of user centred design and usability engineering in assistive technology and accessibility was addressed And finally a combination keynote and panel discussion was reserved for WAI WCAG2.0 which we expect to be the new reference point for Web accessibility from the summer of 2008 and beyond

Resources in Education, 2001-10

Ethical Design of Artificial Intelligence-based Systems for Decision Making Valentina Franzoni, Jordi Vallverdu, Roberto Capobianco, Giulio Biondi, Alfredo Milani, Francesca Alessandra Lisi, Stefano Cagnoni, 2023-11-29 Artificial Intelligence AI including Machine Learning with Deep Neural Networks is making and supporting decisions in ways that increasingly affect humans in many aspects of their lives Both autonomous and decision support systems applying AI algorithms and data driven models are used for decisions about justice education physical and psychological health and to

provide or deny access to credit healthcare and other essential resources in all aspects of daily life in increasingly ubiquitous and sometimes ambiguous ways Too often these systems are built without considering the human factors associated with their use and the need for clarity about the correct way to use them and possible biases Models and systems provide results that are difficult to interpret and are accused of being good or bad whereas good or bad is only the design of such tools and the necessary training for them to be properly integrated into human values

Social Robots in Education Georgios Lampropoulos,Stamatios Papadakis,2025-05-03 This book focuses on recent advances in the field of social robots and their integration in education It elaborates on the progressive evolution of human robot interaction and educational robotics the emergence of digital pedagogy and the implementation of personalized learning methodologies The book also examines the use of artificial intelligence AI in education through the lenses of social robots Hence the book offers an overview of recent research into the adoption integration advancements and impact of social robots and AI in education and presents guidelines and suggestions on how to integrate them in classrooms Specifically the book Provides an in depth overview of social robots and their use in education Presents the advances of social robots and AI in education Showcases innovative solutions and outcomes of integrating social robots in classrooms Discusses the challenges benefits and future research directions of using social robots and AI in education

International Perspectives on Gender and Mathematics Education Olof Steinhorsdottir,Helen J. Forgasz,Joanne Rossi Becker,Kyeonghwa Lee,2010-06-01 Why a book on gender issues in mathematics in the 21st century Several factors have influenced the undertaking of this project by the editors First an international volume focusing on gender and mathematics has not appeared since publication of papers emerging from the 1996 International Congress on Mathematical Education Keitel 1998 Surely it was time for an updated look at this critical area of mathematics education Second we have had lively discussion and working groups on gender issues at conferences of the International Group for the Psychology of Mathematics Education PME for the past four years sessions at which stimulating and ground breaking research has been discussed by participants from many different countries Some publication seemed essential to share this new knowledge emerging from a wider variety of countries and from different cultural perspectives Third some western countries such as Australia and the USA have experienced in recent years a focus on the boy problem with an underlying assumption that issues of females and mathematics have been solved and are no longer worthy of interest Thus it seemed timely to look more closely at the issue of gender and mathematics internationally When the idea for this volume first emerged invitations were issued to those regularly attending the working and discussion groups at PME Potential authors were charged to focus on gender issues in mathematics and were given wide scope to hone in on the issues that were central to their own research efforts or were in receipt or in need of close attention in their own national or regional contexts
