

Gasco's Methodology

How are we doing it?!

GASCO Process Safety Management Application manual was published in April 2013.

This manual outlines the basis to establish sufficient assurance of Process Safety at all GASCO facilities.

It introduces the 12 requirements of Process Safety and aims to provide Asset managers with simple, clear and concise guidance on what should be verified to provide assurance of the Asset.

The requirements in this document have been formulated with the aim to set a minimum level of acceptable Process Safety requirements related to an asset which is part of the operations domain.

By fulfilling these requirements, GASCO leadership team has the confidence that risk controls have been reduced to ALARP, and that a minimum required level of Process Safety is provided and maintained in Operations.
