SHARE Combining these data with a comprehensive account of European welfare state interventions provides a unique opportunity to answer the important public policy questions of our time how the welfare state affects people's incomes housing families retirement volunteering and health The overarching theme of the welfare state creates a book of genuinely interdisciplinary analyses a valuable resource for economists gerontologists historians political scientists public health analysts and sociologists alike

Injury Research Guohua Li, Susan P. Baker, 2012-01-07 Injury is recognized as a major public health issue worldwide In most countries injury is the leading cause of death and disability for children and young adults age 1 to 39 years Each year in the United States injury claims about 170 000 lives and results in over 30 million emergency room visits and 2.5 million hospitalizations Injury is medically defined as organ tissue damages inflicted upon oneself or by an external agent either accidentally or deliberately Injury encompasses the undesirable consequences of a wide array of events such as motor vehicle crashes poisoning burns falls and drowning medical error adverse effects of drugs suicide and homicide The past two decades have witnessed a remarkable growth in injury research both in scope and in depth To address the tremendous health burden of injury morbidity and mortality at the global level the World Health Organization in 2000 created the Department of Injury and Violence Prevention which has produced several influential reports on violence traffic injury and childhood injury The biennial World Conference on Injury Control and Safety Promotion attracts a large international audience and has been successfully convened nine times in different countries In the United States the National Center for Injury Prevention and Control became an independent program of the federal Centers for Disease Prevention and Control in 1997 Since then each state health department has created an office in charge of injury prevention activities and over a dozen universities have established injury control research centers This volume will fill an important gap in the scientific literature by providing a comprehensive and up to date reference resource to researchers practitioners and students working on different aspects of the injury problem and in different practice settings and academic fields
